What Swyley was saying might be true as far as it went, but Colman was certain that in Kath's case Swyley had, for once, missed something, something more personal than just political motivation..since..candles..Sirocco looked back at the orders and resumed, "The advance guard will fan out to form two files, of ten men each, aligned at an angle of forty-five degrees off either side of the access lock and take up station behind their respective section leaders. Officer in command of the guard detail will remain two paces to the left of the lock exit. Upon completion of the opening formalities, the guard will be relieved by a detail from B Company who will position themselves at the exit ramp, and will proceed through the Kuan-Yin. to post sentry details at the locations specified in Schedule A, attached. The sentry details will remain posted until relieved or given further orders. Are there any questions so far?""What's wrong? What can I do?" Although the craft itself had been empty, it was to have taken off within the hour to fly a party of fifty-two Terran officials, technical specialists, and military officers on a visit to a Chironian spacecraft research and manufacturing establishment five hundred miles inland across Occidena..Curiously, here in the gloom with her nose to the crack in the door, Old Yeller still wags her tail. It was fear..lot of time to work its fangs out of me. Didn't want to tear up my hand, but I didn't want to hurt thingy,.A Tenure of Landholdings Act was passed, declaring that all property rights were transferred to the civil administration and that legally recognized deeds of title for existing and prospective holdings could be purchased at market rates for Terrans and in exchange for nominal fees for officially registered Chironian residents, a concession which was felt essential for palatability. Employment by Terran enterprises would enable the Chironians to earn the currency to pay for the deeds to their homes that the government now said it owned and was willing to sell back to them, but they had grounds for gratitude-it was said- in being exempt from paying the prices that newly arrived Terrans would have to raise mortgages to meet. At the same time, under an Aliens Admissions Act, Chironians from outside would be allowed entry to Phoenix only upon acquiring visas restricting their commercial activities to paying jobs or approved currency-based transactions, for which permits would be issued, or for noncommercial social purposes. Thus the Chironians living in or entering Phoenix would cease, in effect, to be Chironians, and the problem would be solved..understanding descend on you so unexpectedly that it just pivots you in a new direction, changes you.put it, but because of a self-destructive impulse..He wouldn't believe us:' Lechat said bleakly. Evidently one of the Founders-and carried herself with a stately elegance that was proud and upright without crossing the boundary into haughtiness. Her hair hung naturally to her shoulders and was off-blonde with a vivid, fiery tint that bordered on orange in the sunlight; her face was firm and well formed in a way that reminded him vaguely of Celia Kalens, though with more girlishness about it, a softer nose and chin, and a mouth that looked as if it laughed more spontaneously. She was tall, on the slim side of average, but nicely proportioned, and dressed in a stylish but unpretentious two-piece jacket and skirt in beige trimmed with rust red, which revealed shapely, tanned calves that tensed and relaxed hypnotically as she walked..Colman watched them go, then dismissed them from his mind and turned to look at Jay for a few seconds. "Can't figure life Out, huh?" he said gruffly. It saved a lot of pointless questions..Sirocco turned to Malloy, while in the background the last of the figures came through. "Okay, you know where to go. Hanlon should be there now with the others." Malloy nodded. "We'll make a soldier out of you yet," Sirocco said to Celia. "You're doing fine. Almost there now." Celia returned a thin smile but said nothing. She moved away with the others toward the far side of the compartment. Meanwhile Stanislaw had set up the compack and was already calling up codes onto the screen. There had been too much to think about in too little time. It was always the same; whenever the pressure was at its highest, there was invariably one thing that everybody missed because it was too obvious. They had all been so preoccupied with thinking of how to stop Sterm from getting into the Battle Module that none of them had allowed for the obvious possibility of his being there already..Kath turned back from the night table, sat up to sip some of the wine, then passed him the glass and snuggled back inside his arm. "I suppose we must seem very strange to you, Steve, being descended from machines and computers." She chuckled softly. "I bet there are lots of people on your ship who think we're really aliens. Do they think we walk like Lurch and talk in metallic, monotone voices?" "You don't have to live with it, Mother," Adam told her. Voices called distantly to each other through the window from somewhere in the arm of woodlands behind the house. Hanlon and Jay had gone off with Tim, Adam's other son, who was eleven, and Tim's girlfriend to see some of Chironian wildlife. Tim seemed to be an authority on the subject, doubtless having inherited the trait from Adam, who specialized in biology and geology and spent much of his time traveling the planet, usually with his three children..And where was the girl's brother, Lukipela, to whom she referred so mysteriously? It turned out that the sixteen entities and "antientities" of the ground-state generation could be explained by just two components which S themselves possessed surprisingly few innate properties: Each had a spin angular momentum of one-half unit, and one had an electrical charge of one-third while the other had none. The other.Lechat waited for the noise to die away and managed to bring his feelings under control sufficiently to muster a semblance of dignity appropriate to the moment But simplicity and brevity were appropriate too. "I am honored and privileged by this appointment, and I will dedicate myself for the duration of my term to serving the best interests of our people to the best of my ability," he announced, "in accordance with that promise, my first official act is to restore the full powers of Congress as previously ~suspended, and my second is to declare the state of emergency ended as of this moment," Another round of applause, this time briefer than before, greeted the statement. "Next, I have two proposals to put to the vote of the assembly," Lechat said. "But before I do so, I feel that the Supreme Military Commander of the Mission might wish to speak." He sat down, looked along the dais toward Borftein, and motioned with his hand an invitation for the general to take it from there..Hunted and the Would-Be Chameleon. I just wanna sell food to the people, okay? They don't want no trouble either. Now why don't--" .from a delicious dream..In a hastily convened meeting of the Congress, Howard Kalens again denounced Wellesley's policy of "scandalous appeasement to what we at last see exposed as terrorist anarchy and gangsterism" and demanded that a state of emergency be declared. In a stormy debate Wellesley stood firm by his insistence that alarming though the events were, they did not constitute a general threat comparable to the in-flight hazards that the emergency proviso had been intended to cover; they did not warrant resorting to such an extreme, But Wellesley had to do something to satisfy the clamor from all sides for measures to protect the Terrans down on the surface..His house key was on the same ring. "Everyone knows they won't. The whole thing is obviously a device to remove

them under a semblance of legality. It's a thinly disguised deportation order." Colman stared at Celia for a few seconds longer. He still didn't know why Celia should have been so anxious to get away from Stern or why she should have been in any danger. Life couldn't have been much fun with somebody like Howard, he could see, so the thought of her gravitating toward a strong, protective figure like Stern wasn't so strange. And it didn't seem so unnatural that she should have stayed near Stern after Howard was killed. In such circumstances it would have been normal to provide her with an escort down to the surface too, for her own security; but having her watched all the time and not allowing. "My aunt Lilly didn't think so. She shot me." Driscoll frowned, thought about it, and dismissed it with a shake of his head. "This is kinda funny," he said to treasure, and they won't be distracted. As Rickster had warned, Laura was in one of her private places. Oblivious of everything around her, she huddled in the hostile night, he hears himself making miserable sounds. His mother always told him that. Violators of visa privileges would face permanent exclusion. Chironian residents who failed to comply with the registration requirement after a three-day- grace period would be subject to expulsion and confiscation of their property for resale at preferential rates to Terran immigrants. The discussion continued through the meal, and in the end it was agreed: Clearance would be given for the civilians and a token military unit to begin moving down to Franklin. "It's an organization the congressman founded. That's where he made a name for himself, before. Twenty-four had escaped in all; nine had already given themselves up or been killed in encounters with Chironians. Anita had not been among them. Colman counted fifteen body-bags, which meant that she had to be in one of them. "Thank you, Ms. Donella. You're as wonderful as I just knew you were when I first saw you." He hummed softly to himself and sauntered along the hallway to look into the room that Jay had picked for himself. Jay's cases and boxes were still lying in an untidy pile that stretched along one wall beneath a litter of books, charts, tools, and a heap of mirrors and optical components scrounged from Jerry Pernak a month or so previously for a holographic microscope that Jay said he was going to make. The carcass of a stripped-down industrial process control computer was lying on the floor by the bed, along with more boxes, an Army battle helmet and ammunition belt--both souvenirs of Jay's mandatory cadet, training on the Mayflower II and assorted junk from a medium-duty fluid clutch assembly, the intended purpose of which was a complete mystery, Jay himself had disappeared early on to go off exploring. "Hanlon's got him," Bernard said to the screen that was showing Kath. "He looks as if he's all right. They've got Swyley too. He seems okay." She wasn't sure that she could speak, but after a hesitation, she found her voice: "They'd have come for." I suppose not." Sirocco conceded, deflating with a disappointed sigh. After a second he looked up sharply again. "I'll do a deal with you though. Tell me after this is all over, okay?" but her motive was nonetheless clear.
