

## AN INTRODUCTION TO PRACTICAL CHEMISTRY INCLUDING ANALYSIS

Eli didn't see it that way. "Hell, Jake, they'll have to come through," he said. "We've got them right by the beans about Zorphwar. (I suspect it was J.L., covering his ass.) Friday afternoon Westland came. He blew a stream of smoke from pursed lips and tapped his cigarette on an alabaster ashtray. "Yes," he said. "Today the sustenance that our industries crave is not oil, but minerals. Fifty years from now our understanding of controlled-fusion processes will probably have eliminated that source of shortages too, but in the meantime shorter sighted political considerations are recreating the climate of tension and rivalry that hinged around the oil issue at the close of the last century. Obviously, South Africa's importance in this context is shaping the current pattern of power maneuvering, and the probable flashpoint for another East-West collision will again be the Iran-Palestine border region, which our strategists expect the Soviets to contest to gain access to the Indian Ocean in preparation for the support of a war of so-called black African liberation against the South." Few of the younger astronauts, scientists, engineers, and North American Space Development Organization executives could remember NASDO without Congreve as its president. For all of them, things would never be quite the same again. "No, I am not saying that SP3 could be modified from a robot craft to carry a human crew. The design could not feasibly be modified at this late stage. Too many things would have to be thought out again from the beginning, and such a task would require decades. And yet, nothing comparable to SP3 is anywhere near as advanced a stage of design at the present time, let alone near being constructed. The opportunity is unique and cannot, surely, be allowed to pass by. But at the same time we cannot afford the delay that would be needed to take advantage of that opportunity. Is there a solution to this dilemma?" He looked around as if inviting responses. None came. "It was one of the fruit," she said, gasping for breath and coughing. "I was heating it in a beaker, turned away, and it blew. I guess it sort of stunned me. The next thing I knew, Marty was carrying me out here. Hey, I have to get back in there! There's another one . . . it could be dangerous, and the damage, I have to check on that?" She struggled to get up but Lang held her down. . . . made any attempts to communicate; she kept to herself, sleeping in the catamaran moored beside the bank across the river and not even venturing into the company store by day to purchase food. Go to your right about ten meters, where you see the steam coming from the web. There, see. Nolan shuddered. That's what she was; an animal. In repose, the lithe brown body was grotesquely elongated, the wide mouth accentuating the ugliness of her face. How could he have coupled with this creature? Nolan grimaced in self-disgust as he turned away. . . . now. You probably didn't see them on the way in, but you saw the models. They're very light, . . . reached forth to meet his fingers, he tingled at the touch. . . . weakness to the one person among the four who might possibly be her rival for leadership. He did not. It was the mystery that Nolan had sensed the first time he saw her staring at him across the village compound three days ago. At first he thought she was one of the company people? somebody's wife, daughter, sister. That afternoon, when he returned to the bungalow, he caught her staring at him again at the edge of the clearing. So he asked Moises who she was, and Moises didn't know. Apparently she'd just arrived a day or two before, paddling a crude catamaran downriver from somewhere out of the denser jungle stretching a thousand miles beyond. She had no English, and according to Moises, she didn't speak Spanish or Portuguese either. Not that she'd. "You must have quite an artists' colony here," Amanda said, looking over the collection. She ran a hand down the smooth curves of a sonatrophic sculpture by Drummond Caspar. The trope leaned toward the sound of her voice. A marbled pool of the same colors spread from her feet into the carpet.

She stood with her. The heat was stifling, worse than anything he could remember. Even Moises was gasping for air as he freeway, and there's ten or fifteen miles of dirt road before the pavement picks up again nearly to 263. By mid-February, he'd begun to be alarmed. Early one morning, defying the weather, he posted himself outside her building and waited (five miserable hours) till she appeared. She was profusely apologetic, explained that she did have his sticker, there was no problem, he shouldn't worry, but she had an appointment she had to get to, hi fact she was already late, and so if he'd come back tonight, or better yet (since she had to see somebody after the pageant and didn't know when she'd be home) at this time tomorrow? Instead, I let her stare wide-eyed at constructions like the Tree House, whose rooms unfolded like flowers along branching stairways spreading up and out from the ground-level entrance unit.
