They sprouted from the ground; isn't it possible they could withdraw when things start to get tough again? They'd leave spores behind them as they retreated, distributing them all through the soil. That way, if the upper ones blew away or were sterilized by the ultraviolet, the ones just below them would still thrive when the right conditions returned. When they reached the permafrost, they'd decompose into this organic slush we've postulated, and. . . well, it does get a little involved, doesn't it?".explain!) is one of the ghastly facts of American education. Some defenses against this experience take the form of asserting there's no such thing as great art; some, that whatever moves one intensely is great art. Both are ways of asserting the primacy and authenticity of one's own experience, and that's fine. But whatever you (or I) like intensely isn't, just because of that, great anything, and the literary canon, although incomplete and biased, is not merely an insider's snobbish conspiracy to make outsiders feel rotten.
