

OMNIANA THE AUTOBIOGRAPHY OF AN IRISH OCTOGENARIAN

Celia shook her head. "Nobody until now." from the Hammond larceny and the five bucks that the dog snatched from the breeze in the parking lot. "That was unfortunate," Bernard agreed. "But in my opinion, sir, he asked for it." "Don't leave them at the post," Sirocco said. What we have to prevent at all costs is Sterm and Stormbel get/ ting in there and detaching the module so that it can threaten the rest of the Mayflower II as well as the planet. This time, Micky resisted being charmed. "That's not funny, Leilani." Instead of making eye contact, avoiding any approach that might seem like an inquisition, Micky. Cupboard to cupboard, drawer to drawer, he searches until he discovers candles and matches, which. "It's a bit different from taking a cab round the Ring," Jay remarked as the ear eased to a halt.. My presuming the right to give any such assurance would be highly illegal, as would be any consequential actions that you might take. I repeat, I have no more to say." .. visible under the door to the right.. Outside the confinement quarters in corridor 8E, two SD guards were standing rocklike and immobile when Driscoll appeared around the corner at the far end, wearing a steward's full uniform and pushing a trolley loaded high with dishes for the evening meal. Halfway along the corridor the trolley swerved slightly because of a recently loosened castor, but Driscoll corrected it and carried on to stop in front of the guards. One of them inspected his badge and nodded to the other, who turned to unlock the door. As Driscoll began to move the trolley, it swerved again and bumped into the nearest guard, causing the soup in a carelessly covered tureen to slop over the rim and spatter a few drops on the guard's uniform.. concentrate on your lessons when your teacher has his hand up your skirt." ". A hand descended on his arm and slid upward to tease the back of his neck. He turned round to find that Kath had come back. "You're starting a bachelors' party here," she said. "I have to break that up before the idea catches on." The section assigned to the Columbia District split up into small groups that came out of the Ring transit tube at different places inside the module and at staggered times. Colman, Hanlon, and Driscoll got off with Lechat, who was dressed to obscure his appearance since he was presumably still high on Sterm's wanted list. They rendezvoused with Carson and three others a few minutes later, then they headed via a roundabout route for the Fran?oise restaurant, which was situated on a public level immediately below the Government Center complex.. Here, now, the hot August darkness. The moon. The stars and the mysteries beyond. No getaway train. Still armored in drollery, with a full bandolier of cheerful banter, Leilani said, "I never thought of myself. spread would allow, just as she'd left it. Her few personal items hadn't been disturbed. The Sinsemilla. I hung it in the hallway," Veronica said, getting up. She walked ahead and out the door while Mrs. Crayford waddled a few feet behind. "Don't bother bringing anything out, Celia," Veronica's voice called back. "I'll come back in for the things." Bernard looked out again and shook his head. "Not until that ship up there is disarmed somehow." After a pause he turned to face her again. "So it doesn't scare you anymore, huh? ". After a while, Leilani shifted her gaze from November in Montana and met Micky's stare. "I knew then." Jay told us you're an engineering officer on the Mayflower 11," Chang said, sounding interested. "A specialist in fusion processes." Bernard hadn't really thought of that. He saw Jay nodding vigorously, and tossed up his hands. "Why not? :If. Bernard's jaw dropped. "Sterm?" he gasped, then looked down at Celia. "You did tell him? ". Leilani said, "He comes from a family of Ivy League academic snots. Nobody in that crowd has a. Because of the problem of both words

having the same initial letter, the dum came to be designated by U and the dee by E. The dum carried a one-third charge, and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible pennutations, UUE, UEU, and EUU. Similarly two dees and a dum yielded the down antiquark in its three possible color as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweeples" such as UUE; UEU; UEU, depending on the color charges assigned to the three constituent quarks. Colman nodded. "To start with, anyhow. Then, I guess, it's a case of how well you make out. You know how things operate here." After a pause he asked, "How about you?" Celia gave her a reproachful look. "Oh, come on... you know that was just a diversion. I haven't seen him for a while now, but then, everyone has been so busy. Finished? Not really . . . who knows?" She got the feeling that Veronica had not raised the subject merely through idle curiosity. She was right. Otto shook his head. "If Earth is tearing itself apart, it ~ because its people allowed themselves to believe the same - self-fulfilling prophecies that you are asking us to accept, Mr. Stern. But we reject them. We need no more protection from you against the people in the EAP starship than they need from their Sterns to protect them against us. We have no need of that kind of strength. Is it strength for neighbors to fortify their homes against each other, or is it paranoia? You must feel very insecure to wish to fortify an entire star system." "Jerry said some interesting things, and they make some sense," Bernard answered, setting the jig down on the bench before him, and sitting back on his stool. ~The Chironians might have some strange ways, but they have a lot of respect-for us as well as for each other. That's not such a bad way for people to be. Sure, maybe we're going to have to learn to get along without some of the things we're used to, but there are compensations. "So they'll be coming for the Spindle next," Charez said. She adjusted the shoulder straps on him. "In that Windchaser, they keep body parts in the bedroom." "How are they going -to pay you?" Jay asked. he'd no doubt be left with a hand full of bones as shattered as the windshield. In the dark, as the big Windchaser begins to move, Curtis sits on the bed and feels along the base of it. "I didn't mean that," Driscoll protested, feeling embar-. "Bluffing, hell." Driscoll laid down five more aces, and the room erupted into laughter and applause. Sirocco had devised a plan for getting the Company up to the ship and into the Communications Center, but it hinged on Stanislaw's being able to alter the orders posted for the day, which were derived from schedules held in one of the military logistics computers. Lechat, who was standing nearby with Celia and Colman, had called for a test-run to make sure that Stanislaw could do- it, since if that part of the scheme didn't work none of the rest could. Sirocco had suspended the briefing to resolve the issue there and then. "You're saying evolution adds up to a succession of transitions like that?" Driscoll sighed irritably. This was no time for long debates. "You don't understand," he said. only the previous evening, over dinner. . . .The Chironian mind had no place for the dismal picture that earlier generations of terrestrial thinkers had painted, that of a universe spawned through a unique accident of Nature, flaring briefly like a spark in the night to dissipate into infinity and be frozen by the spreading, relentless, icy paralysis of entropy. To the Chironian, the universe was but one atom of a possibly infinite Universe of sibling universes, every one of which coexisted at every point in space with the source-realm that hail procreated its family with the profligacy of a summer storm cloud precipitating raindrops. Through that source-realm any one universe could couple to any other, and by coupling into that source-realm, as the antimatter project had verified, every one could be sustained, nourished, and replenished from a boundless, endless hyper domain so vast and unimaginable that everything in existence, from microbes to the farthest detectable quasars, was a mere shadow of just a speck of it. A few times, Sinsemilla whimpered or groaned, although she never woke or attempted to pull away from. Bernard grinned. "It takes some getting used to, doesn't

it? I think we've been shut up in a spaceship for so long that we've forgotten what on-planet life was like." Jay set the painting down by the wall and frowned at it as if he had just noticed it for the first time. "I thought that might look nice in my room." He unslung the backpack and fished inside the flap, which he hadn't bothered to fasten. "I bumped into a couple of guys from school, and we thought maybe we'd get out and see some of the country with some Chironians we met. There's a lot more of it around here than inside the GC module. So I got these." He produced a pair of thick-soled boots, a hooded parka made from a thick, bright red, windproof material with a storm flap that closed over the front zipper, a pair of gloves with detachable insulating inners, some heavy socks, and a hat that could unfold to cover the ears. "We were thinking of going to the mountains across the sea," he explained. "You can get there in a flyer from Franklin in about twenty minutes."It was in the last part that Chiron physics had followed a different mute. The Chironians had taken the remarkable step of extending the equivalence of mass and energy to embrace spacetime itself: All three were merely different expressions of the same "thing." A shock wave forming inside the primordial domain of tweedlestuff, they had discovered, could create an energy gradient sufficient to "tear apart" an element of composite spacetime and decompose it into its familiar dimensions of space and time, in which the laws of physics as commonly understood could come into being. Thus the Chironians had found a cause for the discontinuity that terrestrial scientists had been obliged to postulate arbitrarily..Sirocco raised his eyebrows in what was obviously feigned surprise. "Oh, didn't I tell you? She wants me to move in. It's surprising how a lot of these Chironian women have a thing about Terrans. to he frowned and scratched his nose while he searched for the right words ". . . assist with their future contribution to procreation." He looked up. "She wants my kids. How about that, Steve? Come on, I bet it's the same with Kath." Although by his manner he was trying to be seen to make light of it, Sirocco couldn't hide his exhilaration. Nothing like that had ever happened to him before, and he had to tell somebody, Colman saw; but Colman played along.."So now," said Micky, "in addition to your perpetually wasted tofu-peaches-bean-sprouts mother and.Perhaps the girl mistakenly believed that every secret of her soul was written on her features, or perhaps.bristling with weapons, Curtis follows her..way or another by her tenth birthday, she wouldn't be in danger until the eve of that anniversary; by then,.His confidence is restored..Many businesses were closed now, at 9:20 on a "Tuesday night..Chapter 6.view to him, so he pushes through the door without knowing what lies beyond..inseparably twined with his. "You're excused from taking off your boots," he murmured..victims?.don't deserve the same respect as law-abiding citizens..Pernak and Jean looked at each other, puzzled. "Is this supposed to have something to do with what we're talking about?.the salty tears that offended her more than oozing serpent guts.."Everybody's got something," Shirley insisted. "What do you like doing?". "This looks like what we want, chief," Stanislaou said to Sirocco, and pointed to one of the entries. Sirocco leaned closer to peer at the screen..Later on, Colman thought about Anita being brought back in a body-bag because she had chosen to follow after a crazy man instead of using her own head to decide her life. The Chironians didn't watch their children being brought home in body-bags, he reflected; they didn't teach them that it was noble to die for obstinate old men who would never have to face a gun, or send them away to be slaughtered by the thousands defending other people's obsessions. The Chironians didn't fight that way..janitors and nurses, Rickster knelt and extended a hand to it. As though sensing the spirit of St. Francis.And as she gazed, she discovered what the children were awaiting as it loomed nearer and more terrifying from afar. The realization tightened her stomach. Even from fifteen years ago... it was she--for she had come with the Mayflower H. She knew then that the Chironians were at war, and that the war would end only when they or those sent to conquer them had been eliminated. And in their first encounter, she had sensed the helplessness of her own kind. She felt it again now, as the final veil of the artist's enigma fell away and revealed, behind the fear and the trepidation, a glimpse of something more powerful and more invincible than ill the

weapons of the Mayflower II combined. She was staring at her own extinction.. "But you are. What can you do to stop it?" In fact, he has no idea where he's going. He's not familiar with this land. Civilization might lie within five-hundred rummy." Donella wrinkles her nose. This is virtually the only part of her face that she can wrinkle, because. But Kath talked on freely and naturally, and slowly their inhibitions began to melt. She began by asking how they liked Franklin, and in ten minutes had captivated them all. Soon they were chattering like school kids on a summer vacation--including the relief party from the transporter, who had appeared in the meantime. The detail due for a break seemed to have forgotten about it. Something very strange was going on, Colman told himself again..the trains don't usually go," and whose character as both a publisher and a man has restored my lost faith. "Were they ever there?"
