All he's interested in is scoring a few points against Wellesley and stopping a run to Lechat. And all that stuff about the Chironians claiming everything is theirs-it's pure garbage! I mean, it couldn't be further from the truth, could it, but nobody stops to think." He frowned to himself for a moment. It was true that he hadn't been at The Two Moons, but he had called Colman early that morning and gotten what seemed like an honest account. But with Jean acting the way she was, he didn't want to mention that. "Anyhow, the facts about the shooting are on record," he said. "They'll be through there in a matter of minutes..but only one answer?".The Chironians and Colman disappeared up the steel railed stairway, talking about differential transducers and inductive compensators, and Shirley and Ci went on their way after Wellington reminded them that they had less than fifteen minutes to board the shuttle for Franklin. Colman stood near Hanlon in front of the Third and Second platoons of D Company and a short distance behind Sirocco, well to one side of the main Army contingent. Only a few of the Company were absent for one reason or another, conspicuous among them Corporal Swyley, who was in Brigade sick bay and looking forward to a turkey dinner; the standing order for a spinach-and fish diet had mysteriously erased itself from the administration computer's records. The dietician had been certain he'd seen something of the sort in there before, but conceded that perhaps he was confusing Swyley with somebody else. Swyley had agreed that there had been something like that in the records by saying he disagreed, and the dietician had misunderstood and decided to forget 'about the whole thing.. I'm sort of stuck with her, if you see what I mean, and I know. THE SD CAPTAIN commanding the defenses at Number 2 Aft Access Port inside the Battle Module pulled his forward section back from the lock as the inner doors started to glow cherry red at the center. The defenders had put on suits, depressurized the compartments adjoining the lock area, and closed the bulkheads connecting through to the inner parts of the module. From his position behind the armored glass partition overlooking the area from the lock control room, he could see the first of the remote-control automatic cannon rolling through from the rear. "Hurry up with those RCC's," he shouted into his helmet microphone. "Yellow section take up covering positions. Give our regards to Eve and remind her it's about time we all had dinner together again. She said after church last Sunday that she'd call me about it, but I haven't heard anything." .Bernard gave Jay a stern look. "You don't expect us to believe that, surely. Now, tell us where this stuff came from. I want the truth. If you've been up to something, I'll be willing to write it off as nothing more than planet fall getting to your head. Now--are you sure there isn't something you want to tell us?" .they would come for Noah, not for his sister. Jonathan Sharmer was a thug wrapped in the robes of Hitchcockian-Spielbergian biography with less skepticism than the narrative aroused in Micky.. THE WORLD IS FULL of broken people. Splints, casts, miracle drugs, and time can't mend fractured. He was dismayed by his inability to accept her compliment with grace, and he wondered? though not. "I 'got the last one," Colman reminded them. Somehow the enthusiasm had gone out of the party.. most definitely didn't need a caffeine jolt. Her hands were shaking. The cup rattled against the saucer. Instead of a bath, she took a shower. Her soap of choice? a cake of Ivory? worked well enough to. "I meant as a regular job," Driscoll said. "Oh, Lord." Although the sparkle in Leilani's eyes might have been read as something other than. whenever he was admitted. Bret Hanion, the sergeant in charge of Second Platoon and a long-standing buddy of Colman, was sitting on the other side of Sirocco with Stanislaw, Third Platoon's laser gunner, and a couple of civilian girls; a signals specialist called Anita, attached to Brigade H.Q. was snuggling close to Colman ~with her arm draped loosely through his.. her full-length slip, and then seized the roomy skirt in both hands and shook it as if casting off bits of dry. "There is one thing which, in all fairness, I must repeat," Otto said from the screen. They turned and looked back at him. "We cannot alter our basic decision in any way. If Stern becomes threatening, we will be forced to react. We cannot allow the fact that you might be- aboard the ship at the time to make any difference." .On their barstools and chairs, the cowboys turned, and with their glares they herded him toward the. Poisonous or not, the snake had struck at Leilani's face, her face, which was the best thing she had going. Celia smiled over her glass. "Thank you. It's rare to find such appreciation." .Returning the untouched forkful of pasta salad to her plate, Leilani looked to Micky for an explanation.. fact dozed off in this chair. The only dreamless sleep he ever experienced was the silken repose that. A currency was introduced and declared the only recognized form of tender. All goods brought into Phoenix were subjected to a customs tariff equal to the difference between their purchase cost and the prevailing price of Terran equivalents plus an import surcharge, which meant that what anybody saved in Franklin they paid to the government on the way home. Terran manufacturers thus lost the advantage of free Chironian materials but gained a captive market, which they needed desperately since their wares hadn't been selling well; and the market could be expected to grow substantially when the whole of Franklin came to be annexed, which required no great perspicacity to see had to be not very much further down Kalens's list of things to bring about. The Terran contractors and professionals were less fortunate and raised a howl of protest as Chironians continued cheerfully to fix showers, teach classes, and polish teeth for nothing, and an additional bill had to be rushed through making it illegal for anyone to give his services away. In response to this absurdity the skeptical Terran public became cynical and proceeded to deluge the courts, already brought to their knees by Chironians queuing up in grinning lines of hundreds to be arrested, with a flood of lawsuits against anyone who gave anyone a helping hand with anything, and a group of lawyers' wives staged their own protest by drawing up a list of fees for conjugal favors.. Micky shook her head. "They wouldn't leave you in the care of your

mother's boyfriend." "That's you, Mr. Hooper," Curtis observes. Then he understands. "Oh." The trucker's tears of laughter. Bernard managed a weak smile. "That's a nice thought, but I've got a job to do. We're still going to be busy for a while. Thanks anyway." He thought for a few seconds. "I hope you're not planning anything too tough out them. I mean, Jay hasn't exactly had a lot of practice at that kind of thing. He's never even seen a planet before." Jay winced under his breath and looked away. "Well, of course it does, sweetheart. What would the world be like without toilets?" "Baby, baby," Sinsemilla said, "look at this, look, look. Baby, look, see, look." She extended her hand. Why does man kill? He kills for food. And not only food: frequently, there must be a beverage..worried, scared, in a state. "Speed is essential," Lechat said without preamble...--'~ "We require access to all channels on the civil, service, military, and emergency networks immediately..it. They radiate the telltale intensity: in their stance, in their demeanor. In their eyes.." "Good point," Noah said..coconut oil and distilled essence of cocoa butter?would be the first step on a slippery slope of addiction. Corporal Swyley wasn't saying anything, which was significant because Swyley was usually a pretty good judge of what was what. His silence meant that he didn't agree with what was being said. When Swyley agreed with something, he said he didn't agree. When he really didn't agree, he said nothing. He never said he agreed with anything. When he had decided that he felt fine after the dietitian discovered the standing order for spinach and fish, the Medical Officer hadn't been able to accuse him of faking anything because Swyley had never agreed with anybody that he was sick; all he'd said was that he had stomach cramps. The M.O. had diagnosed that anybody with stomach cramps on his own time had to be sick. Swyley hadn't. In fact, Swyley had disagreed, which should have been obvious because he hadn't said anything..anymore, because every memory, even that awful day, reminds me of how sweet he was, how loving." "You'd better believe it," Lechat promised..slippery thingy, not a monster!". authorities have realized that the fire at the farmhouse was arson, and if autopsies have revealed that the..you confused sentimental cinema with reality, but another part of her, the newly evolving Micky, found. "A hundred." With two types of component or anticomponent to choose from for each triplet, a triplet could comprise either three of a kind of one type, or two of one kind plus one of the other. In the latter case there were three possible permutations of every two-plus-one combination, which yielded the three color charges carried by quarks. The three-of-a-kind combinations could be arranged in only one way and corresponded to leptons, which was why leptons could not carry a color charge and did not react to the strong nuclear force..Her eyes rested momentarily on his chevrons. "Are you Sergeant Colman--the one who's interested in engineering?" Jay frowned and looked mildly uncomfortable. "Sex?" he hazarded..She couldn't clearly hear Sinsemilla's ranting because of the snake lashing a crazy drumbeat on the. Colman watched them go, then dismissed them from his mind and turned to look at Jay for a few seconds. "Can't figure life out, huh?" he said gruffly. It saved a lot of pointless questions.. "Forget it." Jean looked away as she heard the front door open. A few seconds later Jay arrived. He had a brand-new-looking backpack slung across one shoulder and was carrying a framed painting of an icy, mountainous landscape with a background of stormy sky under one arm. His expression was vaguely perplexed..appeared to be malformed..Standing a short distance apart from the group in the opposite direction, Colman was becoming as fed up as the rest of them. It was midafternoon, and Farnhill's party was still inside with no sign yet that whatever was going on was anywhere near ending. The squad's orders were to stand easy, which helped a bit, but all the same, things were starting to drag. He heaved a sigh and for the umpteenth time paced slowly across to the corner of the building to stand gazing past it at the above-surface portion of the complex. Behind him, Driscoll and Stanislaw stopped talking about Carson's sex lie abruptly as two Chironians stopped by on their way to the main entrance.. "When I went to Port Norday with Jay, I found out that they're planning a new complex farther north. They're going to need engineers-fusion engineers. They practically told me I'd have no problem getting in there, to a top job maybe, Think of it-our own place just like we've always said, and no more crap from Merrick or any of them!" Bernard threw his hands high. "I could be me for the first time in my life. . . and so could you, all of us. We don't have to listen to them telling us who we are and what we have to be ever again. Doesn't that.." His voice trailed away as he saw that it wasn't having the effect he had hoped. Jean was backing away through the door, shaking her head in mute protest..Leilani didn't know, didn't care. As though privy to Micky's thoughts, the girl said, "Everything I've ever told you is the truth." Sadness found a surprisingly easy purchase in Geneva's smooth, fair, freckled face. "He was so..Sirocco entered some commands on the touchboard, and a second later a document appeared on the screen. Colman got up and came across to study it while Sirocco sat back..Earth?.while. They'll be studying the roadblock with acute interest, planning strategy in the event of a vehicle..Clem frowned and brought a hand up to his chin. "Depends what you mean by authority," he said. "I organize the regular engineering crew of the ship and supervise the maintenance. I suppose you could say that's authority of a kind. Then again, I don't have a lot to do with some of the special research programs and modifications but Hermann does." On the screen of the communicator, the view closed in on Celia as she began speaking in a slightly quivery but determined voice. But Colman only half heard. He was trying to make himself think the way a Chironian would think..Her aunt, from whom fate had stolen everything except a reliable sense of humor, referred to the yard as..and finished..to the color and glimmer of Cabernet..Anita's eyes blazed as her shock began wearing off and

dissipated itself as anger. "Why should I? Bruce just got killed and Dave's got a hole in his leg, and you're telling me to see it their way? What kind of a man are you anyhow?" She sneered past Colman's shoulder at Kath, who was returning the communicator to her pocket. "I can see why. It didn't take you long, did it? Is she good?." "Yes, I can, and no, there aren't. Why--getting fed up?"
