

SEX FAMILY AND THE CULTURE WARS

Sirocco looked worried. "Look, there is a force on its way forward to occupy the nose. We want to avoid any senseless bloodshed. Those locks must be kept open. I have General Borftein, who wishes to speak directly to whoever is in charge there." "Opposed," Geneva responded with firm resolve. Leilani herself had written lousy weepy epic poems about lost puppies and kittens nobody wanted, but stroking the mutt's head, rubbing behind one of the floppy ears and then behind the other, she was frightened. The Assistant Deputy Director of Engineering at last sat back and descended from his loftier plane of thought. "Ah, yes, Fallows." He gestured toward the screen he had been studying. "What do you know about this man Colman who's trying to get himself out of the Army and into Engineering? The Deputy has received a copy of 'the transfer request filed with the Military and passed it along to me for comment. It seems that this Colman has given your name as a reference. What do you know about him?" The inclined chin and the narrowing of the Gothic eyebrows were asking silently why any self-respecting echelon-four engineering officer would associate with an infantry sergeant. Then Colman's communicator started bleeping. Bernard Fallows was calling from the Communications Center. "I guess you did it," he said. "But it's not over yet. We've found out where Sterm is." "way?" He shook his head slowly. "No, we don't get too much of that kind of thing." Some people present hadn't been there five years before but had arrived with the EAF starship, and others with the European mission that had reached Alpha Centauri a year later. They had called themselves Chinese, Indians, Japanese, and Indonesians then, or Russian, German, French, Spaniard, Italian. . . but now they were all simply Chironians. They too had come to see that the old society could never have transformed itself into a culture that was appropriate to high technology, limitless resources, and universal abundance; it had inherited too much that was self-destructive from its past. The new society, could only have risen in the way that it had-isolated by light-years of space and by its unique beginnings from the mechanisms that had perpetuated the creeds of hatred, prejudice, greed, intimidation, domination, and unreason from generation to generation. "You are certain that we could make the cover of Chiron safely?" In her tiny bedroom, Micky kicked off her toe-pinching high heels. She stripped out of her cheap cotton. underside of the chest, because of the pole punching into the snarled coils and knocking on the. "I don't see the strings." "Will the Chironians let him wait that long?" Colman asked. "Do they know he's in there and what it means?" by fit or fandango. Donella declares, "If anyone around here has a box of chocolates for a brain, then he's sitting in front of. likes to talk about people he's killed? the way they looked when they died, their last words, if they cried. Bernard wasn't getting through, he could see. "Take Kath as an example," he said, turning toward Nanook. "A lot of people around here seem to accept her as... boss. All entrances into the Center itself were guarded. Sirocco had proposed dressing a squad in SD uniforms and marching Lechat and Celia openly up to the main door and brazening out an act of bringing in two legitimate fugitives after apprehending them. But Malloy had vetoed the idea on the grounds that the deception would never stand up to SD security procedures. Then Lechat had suggested a less dramatic and less risky method. As a regular customer of the Fran?oise for many years, he was a close friend of the manager and had spent many late nights discussing politics with the staff until way after closing. They all knew Lechat, and he was sure he could rely on them. The kitchens that serviced the restaurant from the level above also serviced the staff cafeteria in the Government Center, Lechat had pointed out. There had to be service elevators, laundry chutes, garbage ducts- something that connected through from the rear of the Fran?oise. So that was it! Merrick's blue-eyed boy had let him down, and he needed a replacement. Merrick didn't give a damn about Bernard's qualities as an engineer; he was interested only in extricating himself from what was no 'doubt an embarrassing predicament, As Bernard thought back over the deviousness that he had listened to since he sat down, his memory of Kath's frankness and openness, even to a stranger, came back like a breath of fresh air. "You can stuff it," he heard himself say even before he realized that he was speaking. "If you wish. Sir when you talk to me." The Chironian started to continue on his way, but one of the troopers sidestepped to block him. stocked. So I took the test through a sugar rush and a major post-sugar crash. Not that I'm making. Dark with clotted blood, the holes no longer oozed. Kath's voice remained low but took on a note of urgency. "Make sure all of them are closed. Do it now." Bernard shook his head, mystified, and started asking questions again. "Just do it," Kath said, cutting him off. "There might not be much time." Driscoll sighed irritably. This was no time for long debates. "You don't understand," he said. Lechat nodded and seemed satisfied. "That gets us up there," he said. "Now what about getting into the Communications Center?" "Because she's seducing you," a voice murmured from behind him. "But that doesn't mean we have to take chances," Anita pointed out. Bernard managed a weak smile. "That's a nice thought, but I've got a job to do. We're still going to be busy for a while. Thanks anyway." He thought for a few seconds. "I hope you're not planning anything too tough out there. I mean, Jay hasn't exactly had a lot of practice at. that kind of thing. "Everyone knows they won't. The whole thing is obviously a device to remove them under a semblance of legality. It's a thinly disguised deportation order." "Not you," she disagreed, as though she knew him well. "Anger's more like it." He always bought her what she requested? the pajamas were no exception? probably because these years, alcohol had become a reliable part of her arsenal, as useful for keeping life at bay as were anger. Until now, Micky hadn't noticed this deformity. "Everyone's got imperfections," she said. the tavern. recognized the sound as the ring of truth. "He wouldn't get away with it, surely," lay said incredulously. "I mean, you wouldn't still let him walk in and out of places and help himself to anything he wanted, would you?" The soft knock wasn't opportunity, but Micky said, "Come in." as if satisfied that everything was now clear. It wasn't. "Why? What happens with them?" Bernard asked. Nanook hesitated for a moment as if reluctant to risk being offensive by explaining the obvious. He shrugged. "Well . . . usually somebody ends up shooting them," he replied. "So it never gets to be a real problem." hunkers in front of the mutt, pets him, scratches behind his ears, and says, "You wait right here. Like any mature realist, Borftein had come to terms with the regrettable truth that on occasion the plans and stratagems which he approved would result in fatalities, as often as not in agonizing and horrifying ways, but he had learned to "objectivize his perspective" with the detachment required by his profession. The numbers of killed and wounded predicted for an intended operation were presented by his analysts as the "Loss Factor" and the "Combat Reduction Factor," respectively; a city selected to be incinerated along with its inhabitants was "nominated"; an area drenched with napalm and saturated with high explosive was subjected to "exploratory aggressive reconnaissance"; and a village flattened as a warning against harboring insurgents became an object of a "protective reaction." Such were the rules. cover, meaning people as well as books, and now they are proved right again. "I agree," Howard Kalens murmured. "So would you want to go on record as advocating a disloyal and subversive act?" Merrick challenged. "I have to go back inside now to fix things up," Colman said, leading them back toward the gatehouse, where Armley was watching curiously with Jay. "Mike," Colman said to him as they stopped by the door. "Take these two people inside and fix them up with coffee or something, will you. Jay, wait inside with Veronica. I have to get back in with Bret, but I'll be back in a few minutes. Don't worry. It'll be okay." Instrument of nostalgia, scented with desert fragrances that remind the boy of home, the breeze is also a. Breath wheezed in her throat, and each hard exhalation caused her cowl of hair to stir and plume. "Do him good too," Sirocco declared. "Then they might make him an engineer. Wellesley and the Congress had tried to perpetuate the same injustices by eclipsing him with Borftein because he in4p't graduated from the right places or possessed the right credentials. They had tried to fob him off with the command of what they had seen as a proficient but small and unimportant corps of specialists. They had all paid too. Now they all knew who he was and where they stood. He had no regrets about Ramisson's death; it underlined the lesson more forcefully than any words could have done. He was only sorry he hadn't made a cleaner sweep by shooting them all. "Is this the truth?" Bernard asked uncertainly with a strong note of suspicion in his voice. Fury fired her rant, which grew hotter by the word: "Witch with a broomstick up your ass, witch bitch." "He was a perfect gentleman about it," Geneva recalled. her shame hadn't arisen from her rudeness regarding Micky's drinking any more than it had been caused. "Those for?" Lechat invited. All of the members' hands went tip. "Against?" There were no hands. "The resolution is passed," Lechat announced. Phoenix had officially become a part of Chiron once again. At that moment the emergency tone sounded simultaneously from both their communicators, and warning--bleeps and wails went up from places in the labyrinth all around. They looked at each other for a second. The noise died away as Colman fished his unit froth his breast. her cheeks. She kept her fork in motion throughout this silent salty storm, loath to acknowledge what was. If Curtis could trade this particular swell adventure for a raft and a river, he would without hesitation. "Sinsemilla says the Fates can't find you to snip your thread and end your life if they don't know where." "Okay, okay, Hoover." Rastus held up an apologetic hand. "You know I didn't mean it. You do a great job here. And the displays today are very artistic." Tanks filled, the transport pulls away from the pumps, but the driver doesn't return to the interstate. The scene was an alfresco working-lunch, being held on the terrace of the roof garden atop the

Government Center, which crowned the ascending tiers of buildings forming the central part of the Columbia District.
