TWENTY-THREE. nature only from movies, books, and a few casual encounters.. In its natural condition a society was like an iceberg, eight-ninths submerged in crude ignorance and serving no useful purpose other than to elevate and support the worthy minority whose distillation and embodiment of all that was excellent of the race conferred privilege as a fight and authority as a duty. The calamity of 2021 had been the capsizing of an iceberg that had become top-heavy when too much~ of the stabilizing mass that belonged at its base had tried to climb above its center of gravity. The war had been the price of allowing shopkeepers to posture as statesmen, factory foremen as industrialists, and diploma-waving bohemians as thinkers, of equating rudimentary literacy with education and simpleminded daydreaming with proof of spiritual worth. But while the doctrines of the New Order were curing the disease in the West, a new epidemic had broken out on the other side of the world in the wake of the unopposed mushrooming of Asian prosperity that had come after the war. Mankind as a whole, it seemed, would never learn.. Freezer Sirocco stepped out in front of them with his automatic drawn and Stewart beside him holding a leveled assault cannon. Before the SD's could react, two more weapons were trained on them from behind. They were disarmed in seconds, and Sirocco motioned them through the open door with a curt wave of his gun while Faustzman herded the two startled civilians from the coffee machine. Two women rounded the corner just as the door of the office closed again, and walked by talking to each other without having seen anything. Moments later Sirocco left the office again with two privates. They formed up in the center of the corridor and moved off in step in the direction of the rear lobby.. Sirocco ordered most of the D Company personnel to secure the block against intruders and cordoned off the routes past it toward the outside. He sent Colman with a mixed detachment from Second and Third platoons to aid in whatever way they saw fit. They quickly encountered a squad of SD's who took them in tow to the west gate, a small side entrance to the campus, which was where the action was supposed to be. Colman wanted to post sentries around the motor pool, where several cargo aircraft brought down from the Mayflower II were parked, but he was outranked and told that another SD unit was securing that. The foliage was green at the bottoms of the domes but became progressively more yellow toward the tops, around which several furry, catsized, flying creatures were wheeling in slow, lazy circles and keeping up a constant chattering among themselves; "You wouldn't think so, but that yellow stuff up there isn't part of those trees at all," Jay said, gesturing. "Jeeves told me about it. It's a completely different species"--a kind of fern. Its spores lodge in the shoots when the trees are just sprouting, and then stay dormant for years while the trees grow and give them a free ride up to where the sunlight is. It invades the leaf-buds and feeds through the tree's vascular system." Kath's eyebrows lifted approvingly. "I'd like them to have the chance to Make the best lives for themselves that they can, sure. They've got that chance right here. What a crackerjack that girl is, what a sassy piece of work. By sassy, of course, she wanted them to. Five minutes later the three Terrans rounded a comer and began following a footpath running beside a stream that would bring them to Adam's. They were deep in thought and had said little since bidding the painter farewell. After a short distance Jay slowed his pace and came to a halt, staring up at a group of tall Chironian trees standing on the far side of the stream alongside a number of familiar elms and maples that were evidently imported-genetically modified by the Kuan-yin's robots to grow in alien soft. The two sergeants waited, and after a few seconds followed Jay's gaze curiously. Leilani shrugged. "It's the truth. I couldn't make up anything as weird as what is. Wellesley concluded his formal speech and stood looking around the hall for a moment to allow a lighter mood to settle. In the last few days some of the color had returned to his face, his posture had become more upright and at ease, and his frame seemed to have shed a burden of years. The corners of his mouth twitched upward, and those nearest the front caught a

"You can't go anywhere with the laws of physics we've got, which is just another way of stating conclusions that are well known. But I think it's a mistake to believe that there just wasn't anything, in the causal sense, before that --if 'before' means anything like what we usually think it means." Pernak sat forward and moistened his lips. "I'll give you a loose analogy. Imagine a flame. Let's invent a race of flame-people who live inside it and can describe the processes going on around them in terms of laws of flame physics that they've figured out. Okay?" lay frowned but nodded. "Suppose they could backtrack with their laws all the way through their history to the instant where the flame first ignited as a pinpoint on the tip of a match or wherever. To them that would be the origin of their universe, wouldn't it." "Bernie, this is too much!" Jean's voice came up from the lounge area below. "I'm never going to get used to this." Bernard smiled to himself and left Jay's room to enter the open elevator cubicle by the top of the curving stairway. Seconds later he walked out again and into the lounge. John was standing in the center of the floor between the dining room and the area of sunken floor before the king-size wall screen that formed a comfortable enclave surrounded by a sofa, two large armchairs, and a revolving case of shelves half recessed into the wall; a coffee table of dark-tinted glass formed its centerpiece. She gestured helplessly. "What are we ever going to do with all this space? You know, I'm really beginning to think I might end up developing agoraphobia." "They just looked at me," Micky said, "and smelled the chance. If I saw this certain smile, then I knew..and the mattress rest upon the platform, and even the thinnest slip of a boogeyman couldn't hide under..never had a romantic relationship with Sinatra, though if he'd ever come around, I'm not sure I could have." "See, there's that anger again." At any moment, however, one of them might retreat here to the bedroom. Anyhow, Bud told me it'll be open again tomorrow. Check it out and give it a try." At one time, she'd been proud of her beauty. Now she wondered why she had taken so much pride in..punctuated by spells of bewildered placidity..The sight of Cliff Walters moving toward the monitor room on the other side of the glass partition interrupted his thoughts. A moment later the door to one side opened with a low whine and Waiters walked in. Falls swung his chair round to face him and looked up in surprise. "Hi. You're early. Still forty minutes to go." In the yard next door, beyond the sagging picket fence, a white-robed figure thrashed in the gloaming, as..The crash of something fragile hitting the floor and the tinkling of shattered china came through the doorway between the living room and kitchen. Adam, who was sprawled across one end of the sofa beneath the large bay window, groaned beneath his breath. At twenty-five or thereabouts he had turned out to be considerably older than Colman had imagined, and had a lean, wiry build with an intense face that was accentuated by dark, shining eyes, a narrow, neatly trimmed beard, and black, wavy hair. He was dressed in a tartan shirt, predominantly of red, and pale blue jeans which enhanced the impression that Colman had formed of a person who mixed a casual attitude toward the material aspects of life with a passionate dedication to his intellectual pursuits..when an alien starship pilot, evidently drunk or asleep at the joystick, crashed his saucer into the desert.. "It's an organization the congressman founded. That's where he made a name for himself, before..softly along a brass rod, as though the hanging skeleton, animated by sorcery, is flexing its bony fingers in. "Not exactly like," the driving machine disagrees. "Old Yeller was a male. This lovely black-and-white." "Old Yeller would be your dog?"..has taught you to think. I feel bad about that, Micky B, about whatever you went through." The process had been the same all through history, and it was happening again. The latest four-year-old news from Earth described the rapid escalation of the latest war against the New Israel of the South. Only this time the EAF was getting involved. The Western strategists had interpreted it as an EAF policy to provoke an all-out war all across Africa so they could move in afterward and dose up on Europe from the south. Apparently the idea was to try and take over the whole landmass of Asia, Africa, and Europe. Why did they want to take over the whole of Asia, Africa, and Europe? Colman didn't know. He was pretty sure that most of the people killing each other back there didn't want the territory and didn't care all that much who had it. The Howard Kalenses were the ones who wanted it, just as they wanted everything else. Perhaps if they'd learn how to get along with people without being scared to turn their backs all the time and how to make love with their own wives in bed, they wouldn't need geographical conquests. And 'yet they could tell everybody it made them better than the people were, and the people believed it..position to see any light that might leak under or around the door..got my orders." "So have I." "That's different." "How?"..purpose, satisfaction. Certainly not all of them. Maybe not most of them. But some of them..something.
