

THE ECONOMICS OF OPEN ACCESS ON THE FUTURE OF ACADEMIC PUBLISHING

could be redeemed." .door like two drunk kangaroos in a three-legged sack race!" .a hot bath..of a predator, it couldn't have been scarier if it had been a massive python or a full-grown rattlesnake.. "Leilani, honey, you're not going back there," Geneva declared. "We're not going to let you go back to." "Ghost Riders in the Sky" is followed by "Cool Water," a song about a thirst-plagued cowboy and his. A melodic voice arises from the radio, recounting the story of a lonesome cowpoke and his girlfriend in. Old Yeller jumps off the bed and noisily laps up the treat with enthusiasm. She doesn't hesitate or pause. Jarvis and Chaurez caught each other's eye. After a moment, Jarvis breathed a sigh of relief. Chaurez returned a quick grin and went back into the command post to lean over the companel. "Lieutenant," Oordsen demanded angrily from the screen. "Where is Major Lesley? I ordered-" Chaurez cut him off with a flip of a switch and at the same time closed a speech circuit to the loudspeakers commanding the lock area. "Okay, you guys, we're standing down," he said into the microphone stern projecting from the panel. "Get in here as quick as you can. We've got trouble coming up a feeder ramp on the other side." "Sure, I know," the girl said, lowering her gaze to her plate, but hesitating with her fork poised over the. "We-we never believed that story," Bernard said weakly.. Maybe something hideous does lurk in there. Perhaps awaiting Curtis is a discovery far more disgusting. The land slopes down to the west. The earth is soft, and the grass is easily trampled. When he pauses to. Without looking back, the boy said, "The one that's sad." "To your approval, I trust," he said. Celia had suggested a cognac earlier on, when Stern had asked her preference for an after dinner liqueur.. "What are you talking about, Bernard?" .follow you anywhere, push through any door, and insist on your attention, you could find no sanctuary. Colman was listening grimly. "What about his wife?" he muttered to Sirocco.. Shirley turned to look at Ci. "Say, wouldn't he be great to have at our next party? I love things like that." She looked at Driscoll again. "When are you coming down to Chiron?" the bed and on a straight-backed chair; neither the luggage nor the furniture suggested a strategy for this. Bernard's first, fleeting impressions of Franklin from the streaking maglev car were of a hopelessly jumbled-up clutter of a town. Unlike the neat and orderly models of urban planning that had replaced the heaps of American rubble during the recovery after the Lean Years--with business, entertainment, industrial, and residential sectors segregated by green belts and tidy landsculpting--everything in Franklin seemed to be intermingled with no discernible rhyme or reason. Buildings, towers, houses, and unidentifiable constructions of all shapes, sizes, and colors were packed together, overlapping and fusing in some places while giving way to clumps of greenery and trees in others. The whole resulted in a patchwork quilt that looked like a mixture of old New York flattened out somewhat and miniaturized--Paris, and Hong Kong harbor. In one place a canal flanked by an elevated railroad seemed to cut right through a complex that could have been a school or a hospital; in another, the steps of an imposing building with a dignified frontage led directly down to a swimming pool in the center of a large, grassy square surrounded by trees and a confusion of homes and shops. A river opened up as the car crossed through a suspended section of tube, giving a glimpse of a-few yachts drifting lazily here and there, a couple of larger ships moored lower down where the mouth widened against a background of open 'sea, and numerous personal flying vehicles buzzing to and fro overhead; a scene of robot cranes and earthmovers excavating a site on the far bank came and went, and then the car plunged into the lower levels of the metropolis ahead and began slowing as it approached its destination.. Old Yeller? he follows the dog's example and holds his breath, the better to detect whatever noise. THE SD CAPTAIN commanding the defenses at Number 2 Aft Access Port inside the Battle Module pulled his forward section back from the lock as the inner doors started to glow cherry red at the center. The defenders had put on suits, depressurized the compartments adjoining the lock area, and closed the bulkheads connecting through to the inner parts of the module. From his position behind the armored glass partition overlooking the area from the lock control room, he could see the first of the remote-control automatic cannon rolling through from the rear. "Hurry up with those RCC's," he shouted into his helmet microphone. "Yellow section take up covering positions. Green and Red prepare to fall back to the longitudinal bulkhead locks,". Curtis shudders. His fevered imagination supplies numerous chilling possibilities for what was dislodged. When the others had gone, Ceilia sank back in her chair and started brooding again. For the first time in twenty years she felt lonely and truly far from Earth. As a young girl growing up during the rise of the New Order in the recovery period after the Lean Years, she had escaped the harsh realities of twenty-first century politics and militarism by immersing herself in readings and fantasies about America in the late Colonial era. Perhaps as a reflection of her own high-born station in life, she had daydreamed herself into roles of newly arrived English ladies in the rich plantations of Virginia and the Carolinas, with carriages and servants, columned mansions, and wardrobes of dresses for the weekend balls held among the fashionable elite. The fantasies had never quite faded, and that was probably why, later, she had found a natural partner in Howard, who in turn had identified her with his own ideals and beliefs. In her private thoughts in the years that had passed since, she often wondered if perhaps she had seen the Mission to Chiron as a potential realization of long-forgotten girlhood dreams that could never have come true on Earth.. hundred yards to the west. Hurrying, he has covered less than half that distance when he hears the dog. "What?" Merrick sat up rigidly in his chair, "What did you say, Fallows?" "But you've already confirmed that the question of illegality does not arise," Kalens pointed out. "The emergency clauses apply until the elections have been held." "Not fear anymore. But. . . most days I still don't feel clean." .Although he had been only eight years old in 2040, he could remember dearly the excitement caused by the news that a signal had come in from a spacecraft called the Kuan-yin, which had been launched in 2020, just before the war broke out. The signal had announced that the Kuan-yin had identified a suitable planet in orbit around Alpha Centauri and was commencing its experiment. The planet was named Chiron, after

It was the coolest thing ever."Pernak half raised a hand, and his plastic features molded themselves into a more intense expression. "We've talked on and off about society going through phase-changes that trigger whole new epochs of social evolution," he said. "Well, that's exactly what's happened down there. You can't extrapolate any of our rules into this culture. They don't apply. They don't work on Chiron.'Bret Hanlon held up a hand protectively. It was a pinkish, meaty hand with a thin mat of golden hair on the back, the kind that looked as if it could crush coconuts, and matched the solid, stocky build, ruddy complexion, and piercing blue eyes that came with his Irish ancestry. "Don't look at me," he said. "I'm contracted now, all nice and respectable. That's the fella you should be making eyes at." He nodded toward Colman and grinned mischievously.."Well, I--I can't pretend to know anything about that side of things, sir."."Oh." Jay set the painting down by the wall and frowned at it as if he had just noticed it for the first time. "I thought that might look nice in my room." He unslung the backpack and fished inside the flap, which he hadn't bothered to fasten. "I bumped into a couple of guys from school, and we thought maybe we'd get out and see some of the country with some Chironians we met. There's a lot more of it around here than inside the GC module. So I got these." He produced a pair of thick-soled boots, a hooded parka made from a thick, bright red, windproof material with a storm flap that closed over the front zipper, a pair of gloves with detachable insulating inners, some heavy socks, and a hat that could unfold to cover the ears. "We were thinking of going to the mountains across the sea," he explained. "You can get there in a flyer from Franklin in about twenty minutes."..but which seemed only impossibly difficult now..Another bite of pie. More joyless chewing. I've never heard such nonsense."..The violence aroused them. Jonathan's hands slid from Karla's shoulders to her breasts. Soon he was.Bernard stood up. "Sure... don't let me keep you if you have things to do. Thanks for letting me have the cutter back." He turned his head toward the dining area and called in a louder voice, "Hey, you people wanna say good-bye to Jerry? He's leaving." Pernak and lay waited by the door for lean and Marie to appear..Jarvis appeared Suddenly in the doorway beside Charez. "Also there is a detachment from the Battle Module coming up one of the aft feeder ramps. They must be coming back to close the lock."..Door won't open. Handle won't move. He presses, presses harder. No good. Locked, it must be."They're all such selfless do-gooders." Constance Tavenall's voice was crisp with sarcasm but.Laura was safe..A currency was introduced and declared the only recognized form of tender. All goods brought into Phoenix were subjected to a customs tariff equal to the difference between their purchase cost and the prevailing price of Terran equivalents plus an import surcharge, which meant that what anybody saved in Franklin they paid to the government on the way home. Terran manufacturers thus lost the advantage of free Chironian materials but gained a captive market, which they needed desperately since their wares hadn't been selling well; and the market could be expected to grow substantially when the whole of Franklin came to be annexed, which required no great perspicacity to see had to be not very much further down Kalens's list of things to bring about. The Terran contractors and professionals were less fortunate and raised a howl of protest as Chironians continued cheerfully to fix showers, teach classes, and polish teeth for nothing, and an additional bill had to be rushed through making it illegal for anyone to give his services away. In response to this absurdity the skeptical Terran public became cynical and proceeded to deluge the courts, already brought to their knees by Chironians queuing up in grinning lines of hundreds to be arrested, with a flood of lawsuits against anyone who gave anyone a helping hand with anything, and a group of lawyers' wives staged their own protest by drawing up a list of fees for conjugal favors.."He shot my Vernon twice, and apparently then he shot me."..Micky squeezed the woman's shoulder reassuringly. Finding to his surprise that he seemed to have an aptitude, Driscoll had borrowed a leaf from Colman's book and started reading up about the subject.
