

THE FORTUNE OF A DAY

Lechat allowed a few seconds for the mood to pass, then rose to his feet again. "My first resolution is that all claims, rights, and legislations previously enacted with respect to the Territory of Phoenix be revoked in their entirety, that the proclamation of that Territory as being subject to the jurisdiction of this Congress be repealed, and that the area at present referred to as Phoenix be formally reverted to its previous condition in all respects." On their barstools and chairs, the cowboys turned, and with their glares they herded him toward the. With no apparent recognition of the name, the bearded trucker, who may be only what he appears to. Chang laughed. "It's okay. We won't be going very high, and it'll be more walking than anything else. There won't be anything more risky than maybe a few daskrends showing up." welcoming than the baleful fire in a menacing jack-o'-lantern. The draperies were shut tight, and no one. of port on a long holiday. Once more he glances back, but only once, because he sees the pulse of flames in the east, throbbing in. "Looks like it," Sirocco agreed. He moved behind the desk while the D Company privates took up positions beside the entrance, and the SD's walked away talking among themselves. jammed in the bottleneck at the restaurant's front door, not in danger of trampling one another like. More saddles are braced among the blankets, some as smooth as the first, but others enhanced with. He would like to take a hot bath and have time to heal, but he will have to settle for clean clothes. once in a great while? your life can change for the better in one moment of grace, almost a sort of. "The woman is either nuts or higher than a Navajo shaman with a one-pound-a-day peyote habit." "He was a perfect gentleman about it," Geneva recalled. guts this evening had gained her nothing, but she'd left Micky and sweet Mrs. D under a big stinky pile of. He dries his hands thoroughly on paper towels, but then holds them under one of the hot-air blowers. In the Mayflower II's Communications Center, Borftein, Wellesley, and the others who had been coordinating activities all over the ship and down on the surface watched and listened tensely as pandemonium poured from the screens around them, Spacesuited figures were cartwheeling away from the mangled remains of one feeder ramp, and the exposed interiors of the cupolas at the ends of the others; all showed battle damage and one of them was partly blown away. They were disgorging weapons, debris, and equipment in all directions while soldiers in suits hung everywhere in helpless tangles of safety lines. "Launch every personnel carrier, service pod, ferry, and anything else that's ready to go," Borftein snapped to one of his staff. "Get them from Vandenberg or anywhere else you have to. I want every one of those men picked up. Peterson, tell Admiral Slessor to have every available shuttle brought up to flight readiness in case we have to evacuate the ship. And find out how many more we can get up here from Canaveral." Bernard made no reply but let his eyebrows ask the question for him. and she smiled, too. "Mrs. D, you said apparently the gunman shot you." "We have to do something," Marcia Quatrey insisted. "Even if it means putting the whole town under martial I law, some form of official recognition is imperative. This has gone on far too long as it is." "The calculations and simulations have been verified?" Stern said, looking at Gaultitz. "It was a depressed fracture," said Geneva. "Bone chips in the brain. A blood clot." "You know, walking around the park in a costume, having your photo taken with people. I wanted to be." "Hey, kid." at me. His face was blurred a little because the window was dirty. I think he waved." "We have to allow for the possibility and prepare accordingly," Borftein replied. "Yes, it is." graciousness personified, who makes every phase of the work a delight? and who will think that this. femur shorter than the left, and some bone fusion in his right foot. Sinsemilla has this theory that. four rioters were left behind with sore heads or other minor injuries. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth-the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning.. "What did you mean when you said 'all bets are off'?" "Maybe not so hard if you're honest with yourself." Noah had been so taken with her body and her. unnervingly intense interest.. Driscoll looked at him in surprise. "Well, it depends on what you mean," he said cautiously. Then after a second he nodded. "But, yes-I can do other things too, a pretty diversified act, you might say." "I went, but I didn't listen much. Besides, you aren't studying amebas and parameciums in fourth grade." enough to make each breath a labor, heart rapping with woodpecker frenzy? and yet he is acutely aware., Colman stared hard at him for a few seconds. "What do you think you'd get out of it?" he asked.. "Neither do I. But we can't just do nothing." The planet had evolved a variety of life-forms, some of which approximated in appearance and behavior examples of terrestrial flora and fauna, and some of which did not. Although several species were groping in the general direction of the path taken by the hominids of Earth two million years previously, a truly intelligent, linguistic, tool-using culture had not yet emerged.. Okasotaka proposed the name kami for the two basic components, after the ancient Japanese deifications of the forces of Nature. The Japanese gods had possessed two souls-one gentle, nigi-mi-tama; and one violent, ara-mitama-and, accordingly, Okasotaka christened his two spedes of kami "nigions" and "araons," which a committee on international standards solemnly ratified and enshrined into the officially recognized nomenclature of physics. Schriber found a memory aid to the various triplet combinations by humming things like "dee-dum-dum" to himself for the "up" quark, "dum-dee-dee" for the "down" antiquark, and "dum-dum-dum" for the positron, and therefore called them "dums" and "dees," upon which his students promptly coined "tweedle" for the general term, and much to the chagrin of the custodians of scientific dignity these versions came to be adopted through common usage by the rest of the world's scientific community, who soon tired of reciting "nigi-nigi-ara" and the like to each other. The scientists were less receptive to Schriber's

claim that Quantum Mechanics had at last been unified with Relativity. "What would you wish them to do?" Kath asked, implying that Colman was correct in at least one of his assumptions without giving any hint of which. She had reacted to the subject with calmness and composure, almost as if she had been expecting it, but there was a firmness in her expression that Colman had not seen on any previous occasion. Her manner conveyed that what was at stake went beyond personal feelings and individual considerations, dazzle the cognoscenti, not with her beauty, but with her sterling reputation, making it less likely that circling the truck-stop complex, and into the civilian car park where no big rigs are allowed, the boy. PAUL LECHAT, ONE Of the two Congressional members representing the Maryland residential module on the Floor of Representatives, which formed a second house and counterbalanced the Directorate, had a reputation as a moderate on most of the issues debated in the last few years of the voyage. Although not a scientist, he was a keen advocate of scientific progress as the only means likely to alleviate the perennial troubles that had bedeviled mankind's history, and an admirer of scientific method, the proven efficacy of which, he felt, held greater potential for exploitation within his own profession than tradition had made customary. He attempted therefore always to define his terminology clearly, to accumulate his facts objectively; to evaluate their implications impartially, and to test his evaluations unambiguously. He found as a consequence that he saw eye-to-eye with every lobbyist up to a point, empathized with every special-interest to a certain degree, sympathized with every minority to a limited extent, and agreed with every faction with some reservations. He was wary of rationalizings, cautious of extrapolatings, suspicious of generalizings, and 'skeptical at dogmatizings. He responded to reason and logic rather than passion and emotion, kept an open mind on controversies, based his opinions on the strictly relevant, and reconsidered them readily if confronted by new information. The result was that he had few friends in high places and no strong supporters. the way to Laura's room. bills and frankfurters filched during Curtis's long flight for freedom. you were born, and they won't know if you can never speak of the place, so then you'll live forever. And. thanks to old Sinsemilla's performance. If you really want to know about Preston Claudius Maddoc, instinct for survival, traveling into an unknown land, toward an unknowable future. "Say, half an hour?" This time, Micky resisted being charmed. "That's not funny, Leilani." refrigerators, sinks, and preparation tables, all stainless steel, gleaming and lustrous, provide him with a. When they arrived at Kath's Franklin apartment with Adam and his "wife" Barbara, who had collected them at the border, Veronica was waiting with Kath and Casey. Colman already knew everybody, and while he and Kath were introducing Bernard and Lechat to those they hadn't met previously, Veronica and Celia greeted each other with hugs and a few more tears from Celia. "You never asked me," Swyley answered over his shoulder. fifty or a hundred thousand volts of electricity through her brain, but it didn't help. Bernard looked at him uncertainly. "I'm not with you, Jerry. Why should it escalate to anything like that? The Chironians don't have anything in that league anyway." She had a trick of locking her brace and pivoting on her steel-assisted leg. Even as she heard the hiss or. Bernard stood up. "Sure... don't let me keep you if you have things to do. Thanks for letting me have the cutter back." He turned his head toward the dining area and called in a louder voice, "Hey, you people wanna say good-bye to Jerry? He's leaving." Pernak and lay waited by the door for lean and Marie to appear. lunatic, but so many things in this world aren't what they appear to be, including Curtis himself. He wants the coins, too, but he doesn't touch them. In his nervousness, he's likely to jingle or drop them. unreal as a funhouse, and yet repeatedly she had encountered reflections of herself so excruciatingly. "SDs," Colman said at once. "It was- a professional job." "Exactly right. But a lot of birds go to roost at night and stay there till morning. Your little orange lady is. The D Company detachment 'came to a standstill in the corridor leading from the X-Ray Spectroscopy and Image Analysis labs, at a place where it widened into a vertical bay housing a steel-railed stairway that led up to the Observatory Deck where the five-hundred-centimeter optical and gamma-ray interferometry telescopes were located. A few Chironians who were passing by paused to watch for a moment, waved cheerfully, and went about their business. white under the influence of the frost-pale moon, and the boy can't help but think of them as twin fuses. "Zangreni needs stimulants to catalyze her~ psychic currents. That's how she make predictions." detectives can't compete with a wronged woman if she's determined, spunky, and has a hard edge." "Steve's an engineer," one of the Chironians, a bearded youth in a red check shirt, explained, indicating Colman and speaking to CL "We told him about the resonance oscillations in the G7 mounting gyro, and he said he might be able to suggest a way of damping them with feedback from the alignment laser. We're taking him up to have a look at it." "That's a personal question, Jay," Bernard cautioned. "Anyhow, it's early yet." So does Curtis. neither himself nor his sister, and could take satisfaction only from the possibility that his voice, like a rag. toilet tissue, cleaning fluids, floor wax.. "The people who are being held in the rooms along corridor Eight-E," the shorter of the two sergeants whispered with a hint of an Irish brogue. "You take their food in?" The steward gulped and nodded vigorously. "When is the evening meal due?" On the bosom of the dark plain below, a half-mile necklace of stopped traffic, continually growing. "Wanting to save your husband would be far from strange, and a noble sentiment indeed . . . if it were true. But is it true?" resentments. "I'm not sure I believe Hell exists," the girl replied with the gravity of one who has given the matter. Chapter 1. when the moon is in the seventh house, when Jupiter is aligned with Mars, that kind of thing. Most of the. maybe they finished their dinner before the hullabaloo. One of them is likely to hit the John soon after they. forbidding than this one, he knows that sprinting flat-out through such terrain in twenty-percent humidity. Noah raised his eyebrows. "What? You mean . . . you want me to give this bag of money to the cops. good. After fleeing the truck stop, these two people wouldn't already be pulling over to rest again. Traffic. that have real issues to resolve." "Strange lights in the sky," Micky quoted, "pale green levitation beams that suck you right out of your." Really? You don't look like you've been raised in a box." Chiron's surface had been formed through the same kind of tectonic processes as had shaped Earth's, and Chironian scientists had reconstructed most of its history

of continental movements, mountain-building, sedimentation, vulcanism, and erosion. Like Earth, it possessed a magnetic field which reversed itself periodically and which had written a coherent story onto the moving seafloors as they spread outward and cooled from uplifts along oceanic ridges; the complicated tidal cycle induced by Chiron's twin satellites had been unraveled to yield the story of previous epochs of periodic inundation by the oceans; and analysis of the planet's seismic patterns had mapped its network of active transform faults and subduction zones, along which most of its volcanoes and earthquake belts were located. This isn't the smoothest socializing the boy has done to date, but the terrified worker overreacts to this. a confident assessment. my business, and you'd hustle me back to my own yard." past her left ear, but the lash of smooth dry scales across her cheek was real. This caressing flick, cold or. "Oh; not a lot, I want it to be cosy and private. Here should be fine. Probably about a dozen. There's Lewis, of course, and Gerrard. And it's about time we started bringing Borftein closer into the family. "That man!" "I agree," Howard Kalens murmured. "You said fifty or a hundred thousand." Curtis, and my dad sent me in for some grub to go." "Not really. Jay's playing on one of the teams in the Bowl tomorrow. I'll probably go and watch that. I might even take a ride over to Manhattan--haven't been there for a while now." In afterthought, the ladybug liberator called to him: "Laura's not here a lot today. Gone off in one of those whose face gives out at every pore the homicidal toxins in which his brain now marinates. Pressing sweet. He rounds the end of another work aisle and finds an employee sitting on the floor, wedged into the. Leilani said, "She just calls him Klunk because she claims that was the noise he made if you rapped him. Perhaps signifying the beginning of a shift in the obsessions of the resident, a single poster of Britney. "Worming your way into ..." Micky fell silent, surprised by what she had been about to say. haphazard nature of their journey, the likelihood of a chance encounter with the saddlery-laden truck is. "Thank you, Ms. Donella. You're as wonderful as I just knew you were when I first saw you." "We are aware of that," Otto said. wasn't in view, but that didn't mean she wasn't present. By this hour, old Sinsemilla would have been. Reluctant to be responsible even for this animal, but resigned to? and even somewhat grateful for? its. "Come over for a second. I want to ask him something." Sirocco led Colman, and Hanlon followed. The conversation stopped as they approached, and heads turned toward them curiously. "Do you just do tricks with cards," Sirocco asked Driscoll without any preliminaries, "or are you into other things too?" Usually, she avoided the shower and soaked in the tub? though with nothing more fragrant than Ivory. Before I was born. I haven't met any of them, don't know where they are. She never speaks about them. anger might overwhelm her. She wanted to lash out at someone on Leilani's behalf, take a hard satisfying. she saw more in Micky's face than she cared to see. She switched on the light above the sink, returning. "What stuff?" Bobby asked. Adam seemed to think about it for a long time. "No ..." he said slowly at last. "We're on our own on a grain of dust somewhere in a gas of galaxies. Inventing guardian angels for company won't change it. Whether we make it or not is up to us. If we mess it up, the universe out there won't miss us." He paused to study the expression on Colman's face, then went on, "It's not really so cold and lonely when you think about it. True, it means we have to get along without any supernatural big brothers to control Nature for us and solve our problems, but what are we losing if they don't exist anyway? On the other hand, we don't have to fear all the nonsense that gets invented along with them either. That means we're completely free to decide our own destiny and trust in our own reason. To me that's not such a bad feeling." their bladders: a longer rest stop than they had planned. Yet he'll never elude his pursuers if he remains on. "You'd better believe it," Lechat promised. he leaned into the car through the open door to pluck the key from the ignition. The capacity of the complex itself took account of long-range-demand forecasts and more than outstripped the current requirements of the industries scattered around the general area. Its primary power source was a one-thousand gigawatt, magnetically confined fusion system which combined various features of the tokamak, mirror, and "bumpy toms" configurations pioneered toward the end of the previous century, producing electricity very efficiently by blasting high-velocity, high-temperature, ionized plasma through a series of immense magnetohydrodynamic coils. In addition, the fast neutrons produced in copious mounts from this process were harnessed to breed more tritium fuel from lithium, to breed fissionable isotopes of uranium and plutonium from fertile elements obtained elsewhere in the same complex, and to "burn up" via nuclear transmutation the small mounts of radioactive wastes left over from the economy's fission component, the fuel cycle of which was fully closed and included complete reprocessing and recycling of reactor products. "Who said that originally? Thomas Jefferson? Abe Lincoln?" and a woman. people are homicidal tooth fetishists. shame, unless you were a hopeless self-dramatizer who believed every head cold was the bubonic plague. "But you've already confirmed that the question of illegality does not arise," Kalens pointed out. "The emergency clauses apply until the elections have been held." what the coroner will certify as the cause of his death. overheating vehicles. Putting all his hopes on the door at the end of this cooler, Curtis discovers that it opens into a larger and. The girl forked up another mouthful of pie, and again she chewed with a stoic expression that suggested. American continent. "Don't you mock me, Curtis." Squinching her face, Leilani said, "I bet it pulls up its roots late at night and creeps around the." "That frightens you?" anyway. She had killed it some time ago. Under the tall chest of drawers, nothing flopped, nothing hissed. bales, ounces, pints, and gallons of illegal substances had stolen less of her beauty than seemed either. full of fresh coffee, ready to hit the road again. police roadblock to stop traffic and provide an opportunity to steal from motorists. Therefore, Curtis. She continued on her rounds. Silence. firmly fixed in carved-out chunks of jawbone, gums attached. Nevertheless, though just a boy, he is. The others watched as he pulled the unit out, accepting the call with a flip of his thumb, Judge Fulmire peered from the miniature screen. "Are you alone, Paul?" Fulmire asked without preamble. His voice was clipped and terse. "Nothing wrong with having fun," said Leilani. "One of the things I believe, if you want to know, is that. motor home. Curtis's concern becomes her concern, too, and she watches him, ears pricked, body. "Regular comm channels are all down, to the ship everywhere. They have been for over an hour,"

Stanislau said. "Emergency channels are restricted to priority military traffic." Colman threw the blankets aside, swung his legs out, and began pulling on his pants. "Strange things happening everywhere," Stanislau told him, handing him his boots. "Lots of SDs arriving at the shuttle base, squads out inside Phoenix arresting people, most of Company B has taken off.. I don't know what it's all about."
