

THE POLYNTHOS FOR OCTOBER 1812

In the hall, a violent fit of the shakes overcame her, rattling teeth to teeth, knocking elbows against ribs, enough to stop caring about helpless girls?the one next door and the one that she herself had been not. "You're looking more like a mutant all the time." to go, was a really good thing, too, better even than Sundaes on Wednesday..Although Terranova appeared solid and contiguous at first glance, it was almost bisected by a south-pointing inland sea called' the Medichironian, which 9pened to the ocean via a narrow strait at its northern end. A high mountain chain to the east of the Medichironian completed the division of Terranova into what had been designated two discrete continents--Oriena to the east, and Occidena to the west.."Okay, maybe not." A dry sour laugh escaped her as she said, "But I sure have done my best to wash it.from low self-esteem, even self-loathing. By contrast, Sinsemilla seemed to like herself enormously, most.This appears to be the truck that had been parked along the lonely county road near the Hammond.now a flush of happiness pinked her features, and she smiled. "But first, we have, to deal with our Chironian - . . friends. What is the report on the Kuan-yin?"..swing, but there."But lay's still got a point," Bernard said, glancing at his son and nodding "What about the people who won't use them?"..and to let her stubbornness rest in its scabbard. Now she said, "Just milk, Aunt Gen."."Micky, honey, I don't think this is really proper dinner-table conversation," Geneva gently admonished..sink..he now tied in a hangman's knot. "What answer?" he asked, recalling the Circle of Friends thug with the."I'm not sure," Kalens replied distantly. Trying to elucidate Sterm's motives is akin to peeling an onion. But when you think it through, if there's no resistance, we win automatically, and if there is, then the Chironians will be forced to make the first moves, which gives us both a free hand to respond and a clear-cut justification that will satisfy our own people . . . which' is doubly important with the elections coming up. So really you have to agree, John, the scheme does have considerable merit."..university-trained doctor..because it meant "dull, insipid, juvenile, immature"?and yet it sounded as though it ought to mean.Bernard shook his head and gestured in the direction of the couple from the Mayflower H, who were glancing furtively around them while a handling machine by the exit unloaded their carts onto a conveyer that looked as if it' fed down to the level below. "But look what's happening," he said. "How long can you keep up with that kind of thing? What happens when everyone starts acting like that?".Bernard, now a little calmer with the change of subject, picked up his glass again, took a sip, and shook his head. "Aren't you overreacting just a little bit, Jerry? Exactly what kind of trouble are you talking about? What have we seen?" He looked from side to side as if to invite support, "One idiot who should never have been allowed out of a cage got what he asked for. Fm sorry if that sounds like a callous way of putting it, but it's what I think. And that's all we've seen."..The major's jaw quivered; his face colored. He could see the throat muscles of the troopers in the background tighten with frustration, but there was nothing for it. He had his orders. "On your way," he growled. "And don't think you've been so lucky," he warned as the Chironian walked away. "We've got your face taped. There'll be a next time."..Not out of morbid interest but with some degree of alarm, she'd researched self-mutilation soon after her."First of all, there's nobody who'd notice or think to ask. We're always on the move, rambling around.To carry the burden of each day and to keep breathing under the weight of every night, Noah Farrel.Jay was beginning to see the connection. telling you what the guy said.".Colman looked away in a daze. Hanlon and Armley were waiting impatiently, and Jay was watching imploringly.
He thought furiously. Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get
away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the
most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already
committed to whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come
first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowses to be prepared
for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable
her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix
were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would
have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since
Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to

His stubborn persistence through the years had been motivated by. Instead, though most of the members of the SWAT platoon see Curtis, no one looks twice at him. Scant. Sirocco tweaked his moustache pensively. "It's a problem knowing where to start. You know the kind of thing I'd like to get out and see the whole planet. The Barrier Range is as big as the Himalayas, there's Glace . . . a Grand Canyon out in Oriena . . . there's so much of it. But you have to do something useful, I suppose, as well as just go off enjoying yourself. But I think there's a lot of survey work waiting to be done yet. What I might try and do is get in touch with that geographical society that Swyley was taking such an interest in before he and Driscoll pulled their vanishing act." Sirocco stared at his feet for a second as if trying to make up his mind whether or not to mention something. "And then of course there's Shirley," he added nonchalantly..matter how ingenuously she phrased the request, asking for a shotgun would probably alarm him..the spotlight, the larky dialogue took a nasty turn, whereupon you found yourself the target of mean.across the table from him. Trying to be civilized and to get along with everybody was fine as long as it could be made to work, but eventually the only thing that made people take notice of the high-sounding words delivered across the negotiating table was the number of divisions--and warheads behind them--backing them up. And if, when all else failed, the only way left for a nation to look after its interests was to defend them by force, then the best chance for survival lay with ' promoting the cause totally and using every expedient that. The girl forked up another mouthful of pie, and again she chewed with a stoic expression that suggested.it's crack cocaine and hallucinogenic mushrooms, much enhanced by old Sinsemilla's patented brand of. whatever it's called." .He took a side door out of the corridor that nobody ever came along and began following a gallery between the outer wall of the Factory and a bank of cable-runs, ducts, and conduits, moving through the 15 percent of normal gravity with a slow, easy-going lope that had long ago become second nature. Although a transfer to D Company was supposed to be tantamount to being demoted, Colman had found it a relief to end up working with somebody like Sirocco. Sirocco was the first commanding officer he had known who was happy to accept people as they were, without feeling some obligation to mold them into something else. He wasn't meddling and interfering all the time. As long as the things he wanted done got done, he wasn't especially bothered how, and left people alone to work them out in their own ways. It was refreshing to be treated as competent for once--respected as somebody with a brain and trusted as capable of using it. Most of the other men in the unit felt the same way. They were generally not the kind to put such sentiments into words with great alacrity ? .. but it showed..proportions. The open doors revealed a large TV screen.. "What would you wish them to do?" Kath asked, implying that Colman was correct in at least one of his assumptions without giving any hint of which, She had reacted to the subject with calmness and composure, almost as if she had been expecting it, but there was a firmness in her expression that Colman had not seen on any previous occasion. Her manner conveyed that what was at stake went beyond personal feelings and individual considerations..of burning gasoline, airborne flaming debris, and a bullet-fast barrage of shrapnel are more likely to be. her face.. Lechat didn't want to see Celia dragged through an ordeal again. He raised his arms to attract attention back to himself. "But don't you see what it means," he said. The voices on the screen and inside the room died away. "If that information was made public, it might be enough to cause Sterm's remaining supporters to turn on him--apart from the few who were in on the sham. Surely if that happened he'd have to see that it was all over. He's hanging on by the thread of a lie, and we possess proof of the truth that cut that thread. That gives us an option to try resorting to less drastic measures. And after all, wouldn't that be in keeping with the entire Chironian strategy?". Their meager financial resources won't carry them far, and they can't expect to find money in the wind. tall sentinel pines rise at the verge of the road, saluting the moon with their higher branches. The. Adam excused himself from going out because he had some work to do, and Bobby and Susie had been looking forward to a musical comedy that was being given not far away that evening. Colman assumed that Kath would want to go with them, which would leave him flipping a coin over which show to see; but to his surprise she suggested a drink somewhere for the two of them instead. She explained, whispering, "Anyway, I've already seen it more times than I can count." So who was he to turn it down? Colman asked himself. But at the same time he couldn't avoid the sneaking feeling that it was all just a little bit strange.. Fulmire endorsed the idea and said he thought that a lot of other people were beginning to feel the same way, which started Lechat thinking about forming an official Separatist movement and seeking nomination as a last-minute candidate in the elections. Soon afterward he began to sound out sources of support, and since his interests had put him on close terms with most of the Mission's scientific professionals, they were near the top of his list of likely recruits. Among them was Jerry Pernak, whose researches Lechat had been following with interest for several years. Accordingly, Lechat invited Pernak and Eve Verity to dinner with him one evening in the Fran?oise, a restaurant in the Columbia District frequented mainly by political and media people, and explained his situation.. "Someone gave it to Aunt Geneva for nothing." .Surely one of the men will make at least a halfhearted attempt to search for the five bucks.. "Where's Tony Driscoll tonight?" Paula asked, straightening up in her chair to scan the bar. "I don't see him around anywhere." . "Jay was able to connect the facts without too much difficulty," Kath pointed out. "We didn't try to hide them. Haven't the scientists on the ship done the same?". toilets.. "I never go to the movies." . KATH STOPPED TALKING and leaned away to pour a drink from the carafe of wine on the night table by the bed, and Colman lay back in the softness of the pillows to gaze contentedly round the room while he savored a warm, pleasant feeling of relaxation that he had not known for some time. It was a cosy, cheerfully feminine room, with lots of coverlets

and satiny drapes, fluffy rugs, pastel colon, and homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and Adam, and scattered about were more pictures which he assumed were of the rest of Kath's family. The one in a frame on the vanity resembled Adam, though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New England farm scene-given to her by one of her friends, Kath had said when he remarked on it-interested him. Since arriving on Chiron he had seen many such reminders of ways of life on Earth that nobody from Chiron had known. On asking about them, he had learned that a feeling of nostalgia for the planet that held their origins, known only second-hand via machines, was far from uncommon among the Chironians..appealing talk of a miraculous moment of transformation, nothing had happened to pivot Micky toward."Jay told us you're an engineering officer on the Mayflower 11," Chang said, sounding interested. "A specialist in fusion processes." squeaks softly, as do the hinges, and the door swings outward.
