

THE RECONNAISSANCE

one of them echoed back in memory. The girl had asked if Micky believed in life after death, and when. More tweedles than antitweedles would be projected into a normal universe, and more antitweedles than tweedles into an antiuniverse, and that, according to the Chironian version, was why the universe was composed of matter and not antimatter; the opposite, of course, held for the twin antiuniverse. The way to obtain antimatter, they therefore reasoned, would be to make a small part of the universe look like an antiuniverse so that tweedlespace could be "fooled" into projecting antitweedles instead of tweedles into it. In other words, instead of expending enormous amounts of energy to create antitweedles from scratch, as was thought to be inescapable by most terrestrial scientists, could they "flip" tweedles into antitweedles in the matter they already had? added a soundtrack only where we've got conversation that'll ruin him." Once, when an outlaw mouse scurried from room to room and along hallways, eluding a comic posse of the trains don't usually go," and whose character as both a publisher and a man has restored my lost faith. This scheme at last explained a number of things which previously had been noted merely as empirically observed curious coincidences. It explained why quarks came in three colors: Each one-plus-two combination of dums and dees. Stern snorted. "I need neither. The same forces that will subdue Chiron will subdue the people also." His eyes flickered over Celia's body momentarily. "And they will submit because they, like you, have an instinct to survive." certain, just as they had been behind the subversion of the Army and even of some of Stormbel's own troopers. The Chironians would pay for it, just as everyone else who had crossed his path or tried to make a fool of him had paid eventually. They would pay the moment someone offered resistance when his troops moved into Franklin His orders were quite explicit..likely to gallop. The windshield provides a view only of another?and unoccupied? Explorer ahead, plus. "I'm sure Adam would be more than happy," Kath interjected. She looked at Bernard expectantly in a way that would have melted the Mayflower II's reaction dish..All entrances into the Center itself were guarded. Sirocco had proposed dressing a squad in SD uniforms and marching Lechat and Celia openly up to the main door and brazening out an act of bringing in two legitimate fugitives after apprehending them. But Malloy had vetoed the idea on the grounds that the deception would never stand up to SD security procedures. Then Lechat had suggested a less dramatic and less risky method. As a regular customer of the Fran?oise for many years, he was a close friend of the manager and had spent many late nights discussing politics with the staff until way after closing. They all knew Lechat, and he was sure he could rely on them. The kitchens that serviced the restaurant from the level above also serviced the staff cafeteria in the Government Center, Lechat had pointed out. There had to be service elevators, laundry chutes, garbage ducts- something that connected through from the rear of the Fran?oise..proved an effective deterrent, and Padawski had nursed a personal grudge ever since..A call came through from Brigade, and Sirocco switched into the audio channel to take it. Colman sat back and looked around. The indicators and alarms on the console in front of him had nothing to report. Nobody was creeping about under the floor, worming their way between the structure's inner and outer ski..~, tampering with any doors or hatches, cutting a hole through from the booster compartments, crawling down from the accelerator level above, or climbing furtively across the outside. Nobody, it seemed, wanted any thermonuclear warheads today. He rose and moved round behind the chair. "Need to stretch my legs," he said as Sirocco glanced up behind his faceplate. ', It's time to do a round anyhow." Sirocco nodded and carried on talking inside his helmet. Colman shouldered his M32 and left the guardroom..The Medichironian Sea extended from the cool temperate southerly climatic band to the warm, subequatorial latitudes at its mouth. Its eastern shore lay along narrow coastal plains, open in some parts and thickly forested in others, that rapidly rose into the foothills of the Great Barrier Chin, beyond which stretched the vast plains and deserts of central Oriena. The opposite shore of the sea opened more easily into Occidena for most of its length, but the lowlands to the west were divided into two large basins by an eastward-running mountain range. An extension of this range projected into the sea as a rocky spine of fold valleys fringed by picturesque green plains, sandy bays, and rugged headlands, and was known as the Mandel Peninsula, after a well-known statesman of the 2010s. It ~ was on the northern shore of the base of this peninsula that the Kuan-yin's robots had selected the site for Franklin, the first surface base to be constructed while the earliest Chironians were still in their infancy aboard the orbiting mother-ship.. "One second," a voice said from behind them. They looked round to find a Chironian robot winking its lights at them. It was a short, rounded type, which made it loose tubby. "You haven't taken any of our special-offer hand gardening tools. Do you want to grow fat and old before your time? "Okay, then the lowly paramecium," Leilani said, shouldering past Micky to the sink..Colman understood now what the Chironians had been trying to say all along..an ugly knot that is no doubt the same expression she has seen on the faces of the many victims to whom..A fly line of panic casts a hook into the boy's

"I'm not sure I believe in life before death," Micky said. It wasn't quite the answer that Celia had been prepared for. She frowned for a second, then reached for her glass. "The reaction that it might provoke worries me. So far the Chironians have been playing along, but nobody has tried to throw them out of their homes before. We've already seen examples of how they do not to hesitate to react violently." Everybody looked at Colman again, this time with a new interest. A different mood was taking bold of the room, and it was affecting the people on the screen, who were leaning forward and listening intently. So far it was just an idea, but already it was beginning to hook all of them..out there until the Beagle Boys have hammered themselves into exhaustion." "Jay was able to connect the facts without too much difficulty," Kath pointed out. "We didn't try to hide them. Haven't the scientists on the ship done the same?" Curtis eases off the bed. He feels the wall beside the jamb, finds the switch..Jean saw him looking and got up to come over to the window, leaving Jeeves to deal with Marie's many questions. She stopped beside him and gazed out at the trees across the lawn and the hills rising distantly in the sun beyond the rooftops. "It's going to be such a beautiful world," she said. "I'm not sure I can stand much more of this waiting around. Surely it has to be as good as over." Jay began speaking earnestly and in a low voice. "My father asked me to find you. It's urgent. One of the people the SDs are looking for is at the house. Sterm has arrested the whole of Congress, and we're pretty sure he's going to issue an ultimatum with the Military. If they do the Chironians will take out the whole ship. Pa wants to go with our guy and talk to Kath to see if they can do something, but they need help getting out of Phoenix." "I'm just a kid." Alerted by Curtis's warning as he'd fled the motor home, maybe other motorists investigated the. This wasn't so much to want. The twisted leg, the deformed hand, the brain too smart for her own good: The bag was folded and sealed. Noah peeled back the tape, opened the flap, and half extracted a wad. He deflated suddenly and shook his head. The words to handle the situation just wouldn't come. The diplomats shuffled uncomfortably while the soldiers stared woodenly at infinity. A few awkward seconds dragged by. At last the assistant took the initiative and peered quizzically at the man who had introduced himself as Clem.. "To herself, for sure," Leilani agreed. "Not really to others." Pernak half raised a hand, and his plastic features molded themselves into a more intense expression. "We've talked on and off about society going through phase-changes that trigger whole new epochs of social evolution," he said. "Well, that's exactly what's happened down there. You can't extrapolate any of our rules into this culture. They don't apply. They don't work on Chiron." "I've never been much good at relationships . . . but I'm willing to try." What followed was a General Foul-up..Instrument of nostalgia, scented with desert fragrances that remind the boy of home, the breeze is also a driving machine says, and the dog obligingly swishes his tail, sweeping the pavement on which he sits..He always bought her what she requested?the pajamas were no exception?probably because these."The build-up at Canaveral is proceeding on schedule and will be completed before midnight," he informed Sterm at a midday staff meeting in the Columbia District's Government Center. "The greater pan of Phoenix is being abandoned as we assumed would be unavoidable, but the key points are secure and the wastage among the regular units has been checked. Transfer of SD forces to the surface will be completed by early evening, with the exception of those units being held to cover the Battle Module, the Columbia District, and Vandenberg. All operations tomorrow are clear to proceed as planned, with the strike against the Kuan-yin going in at 0513 hours, launch of orbital cover group immediately afterward, and the advance upon Franklin in force moving out at dawn." Jay blinked and looked up to find Pernak watching him curiously. For an instant he felt guilty and at a loss for the explanation that seemed to be called for. "Bernard told me about it," Pernak said before Jay could offer anything. "I guess he's under a lot of pressure right now, so don't read too much into it." He stared at the box in Jay's hand. "I don't see anything--not a damn thing. Come on, Jay. Let's take a look at that loco of yours." "What an impressive name," Geneva said. "Like a Supreme Court justice or a senator, or someone.Farnhill's staff had given up trying to get the Chironians to provide an official list of who would be greeting the delegation. In the end they had simply advised the Kuanyin when the shuttle would arrive and resigned themselves to playing things by ear after that. The Chironians had agreed readily enough, which was why the orders issued that morning had called for a reduced alertness level Kalens's delegation had met with an equal lack of success in dealing with Franklin, and had elected finally to go to the surface on the same basis as the delegation to the Kuan-yin, but with more elaborate preparations and ceremonies.."Oh." Jay set the painting down by the wall and frowned at it as if he had just noticed it for the first time. "I thought that might look nice in my room." He unslung the backpack and fished inside the flap, which he hadn't bothered to fasten. "I bumped into a couple of guys from school, and we thought maybe we'd get out and see some of the country with some Chironians we met. There's a lot more of it around here than inside the GC module. So I got these." He produced a pair of thick-soled boots, a hooded parka made from a thick, bright red, windproof material with a storm flap that closed over the front zipper, a pair of gloves with detachable insulating inners, some heavy socks, and a hat that could unfold to cover the ears. "We were thinking of going to the mountains across the sea," he explained. "You can get there in a flyer from Franklin in about twenty minutes."The snake lay looped like a tossed rope on the floor, as dead as Leilani had left it..slams him, rich with the stink of hot metal and motor oil..matter how ingeniously she phrased the request, asking for a shotgun would probably alarm him.."Those for?" He thought for a second longer, and then looked at Lechat and Bernard. "There were a lot of suspicious things about Padawski breaking out too. It couldn't have happened the way it did without inside help. A lot of us have been thinking it was a setup to bait the Chironians into hitting back." she asked, "So why're you there?
