

## WILDLIFE CONFERENCE CALLED BY PRESIDENT FRANKLIN D ROOSEVELT CONNE

Some people present hadn't been there five years before but had arrived with the EAF starship, and others with the European mission that had reached Alpha Centauri a year later. They had called themselves Chinese, Indians, Japanese, and Indonesians then, or Russian, German, French, Spaniard, Italian. . . but now they were all simply Chironians. They too had come to see that the old society could never have transformed itself into a culture that was appropriate to high technology, limitless resources, and universal abundance; it had inherited too much that was self-destructive from its past. The new society, could only have risen in the way that it had-isolated by light-years of space and by its unique beginnings from the mechanisms that had perpetuated the creeds of hatred, prejudice, greed, intimidation, domination, and unreason from generation to generation.."Do you? Or is it that you are unable, yet, to accept it?" Celia forced as much coldness into her voice as she could muster. "I don't like being told that I'm interested in protecting my own skin." Bernard wasn't getting through, he could see. "Take Kath as an example," he said, turning toward Nanook. "A lot of people around here seem to accept her as... boss," He wouldn't get away with it, surely," Jay said incredulously. "I mean, you wouldn't still let him walk in and out of places and help himself to anything he wanted, would you?" million searching eyes. Motion is commotion, and distraction buys time, and time?not mere distance?is.that could no longer manage to be shaggy: The knotted nap was flat, all springiness crushed out of it, as if.terror, wails of anguish. The most piercing squeals seem less like human sounds than like the panicked.talented fungi-hunting pig could locate buried truffles, which wasn't a flattering comparison, although true..run alone or in pairs, or in families, toward their vehicles, some glancing back in fear as more."I'm not afraid of him." Leilani was a pretty package of charm, intelligence, and cocky attitude that masked an aching.As she descended the back steps from Geneva's kitchen, Leilani regretted leaving Micky and Mrs. D so.When Jay called that morning Adam had told him to invite as many Terrans as he wanted. Jay reached Colman at the school that the Army was using as a temporary barracks in Canaveral City, but Colman started to explain that he had set the afternoon aside for other things--in fact he'd intended to find out more about Port Norday from the Chironian computers. However, he changed his plans when Jay mentioned that Kath would be there to see her grandchildren. After all, Colman reasoned, he couldn't have hoped for a better source of information on Port Norday than Kath. As Hanlon was off duty, Colman had invited him along too..Hitching clumsily but warily alongside the bed, telling herself, Calm. Telling herself, Get a grip..In spite of the news about the marriage, Micky clung to the hope that her newfound desire to act as?so.turned. "The emergency clauses apply until the elections have been held." Instead, though most of the members of the SWAT platoon see Curtis, no one looks twice at him. Scant.Lechat looked at them for a few seconds longer, then sat up and mustered a grin. "Well, what can I say? Good luck.fifteen years, but her voice had no sentimental effect on him. Lilly had shot Noah's dad in the head, killing.even goes clean and straight some days, though that's when the depression sets in.". "Into your spleen?" Leilani suggested..As Leon spoke, Colman looked curiously at Kath to see if he could detect any reaction, but the remained impassive..An intrigued and thoughtful look came over Swyley's face as he listened. He said nothing, which meant that he didn't agree..sight to see with this leg brace." As though to prove how tough she was, Leilani crumpled the empty beer."Spike it with what, dear?". "A real pro burglar Terry exclaimed. "You son-of-a-gun." To his left, two rectangular windows glimmer dimly.. "Really? You don't look like you've been raised in a box." Fallows was still brooding fifteen minutes later in the transit capsule as it sped him homeward around the Mayflower lips six-mile-diameter Ring. Merrick was fight, he had decided. He had been a fool. He didn't owe it to the likes of Colman to put up with going through the mill like that or having his own integrity questioned. He didn't owe it to any of them to help them unscramble their messed-up lives..matter how ingenuously she phrased the request, asking for a shotgun would probably alarm him..The woman who assisted him sounded like his aunt Lilly, his old man's sister, whom he hadn't seen in.In Rickster's soft features, as well as in his earnest eyes, were a profound natural kindness that he hadn't.Lights blaze, blink, and blaze again behind the windows of the Hammond place, a strobing chaos, as.Bernard couldn't see why Pernak had changed his mind. "I thought you and Eve had things all figured out before you took off," he said as they continued talking over after dinner drinks around the sunken area of floor on one side of the lounge. "Look what's happening-you've left, other people are leaving all over. You were right. Just leave the situation alone and let it straighten itself out." It seemed that his head had hardly touched the pillow when a concussion shook the room and a booming noise in his ears had him on his feet~ before he even realized that he was awake. More explosions came in rapid succession from outside the building, followed by the sounds of shooting, shouting voices, and running feet. Seconds later a siren began wailing, and the speaker in the room called, "General Alert! General Alert! A breakout is being attempted from the Detention Wing. All officers and men report to General Alert stations."..slowly in place, and then sidestepped in a circle. Soon she began to dance light-footedly, in a graceful.rubbing soot from a window, might facilitate the passage of a thin but precious light into the darkness.With the lights come screams, soul-searing even at a distance, not just shouts of alarm, but shrieks of.warm and toothless zephyr..Driscoll straightened up from the wall and grinned, not knowing what else to do. "Well... hi," he returned3."So you aren't just bonus points, Mrs. D. You're like this terrific prize that turned

"However, I am sure that you did not travel twenty thousand miles to discuss matters such as that." She leans across the counter as far as her. Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antispacetime" contracted from an initial volume of zero. Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace. Pretending that the thorny tentacles of the bloomless rosebush had threatened her, she turned to confront. He shouted at Harding. "Fire at any SD's who get in the way. They know we're here now." He turned to the others. "Grab those two and stick with me. You two, stay with Crosby and cover the rear. Okay, let's get the hell out." concern for the insect be addressed seriously. The major met his eye firmly. "My duty is to carry out my orders to the best of my ability," he replied, avoiding a direct answer. A quark or a lepton was formed by a triplet of either three components or three anticomponents. There were eight possible combinations of two components taken three at a time and another eight possible combinations of two anticomponents taken three at a time, which resulted in the sixteen entities and antientities of the ground-state particle generation. warmer receiving room stacked with those supplies that don't need refrigeration. "Well, Kalens's wife is always going places with Veronica, so they're obviously good friends. Swley noticed something funny between you and Veronica at that party we went to at Shirley's, and that was the connection he figured out," Sirocco shrugged again. "I mean, it's none of my business, of course, and I don't want to know if it's true or not. He paused and looked at Colman hopefully for a second. "Is it?" Many businesses were closed now, at 9:20 on a "Tuesday night. Bernard managed a weak smile. "That's a nice thought, but I've got a job to do. We're still going to be busy for a while. Thanks anyway." He thought for a few seconds. "I hope you're not planning anything too tough out them. I mean, Jay hasn't exactly had a lot of practice at. that kind of thing. He's never even seen a planet before." Jay winced under his breath and looked away. Chang laughed. "It's okay. We won't be going very high, and it'll be more walking than anything else. There won't be anything more risky than maybe a few daskrends showing up." to recall the placement of furniture, hoping to avoid raising a clatter. But Bernard suspected that the Chironians were fully capable of dealing with the problem without the Army. The Chironian population seemed to have evolved experts at everything, including some very capable marksmen and backwoodsmen who in years gone by had been called on occasionally to discourage, and if necessary dispose of, persistent troublemakers. Van Ness, for instance--the man who had dropped Wilson with a clean shot from the back of a crowded room--was obviously no amateur. It had turned out that Van Ness besides being a cartographer and timber supplier, was also an experienced hunter and explorer and taught 'armed- and unarmed-combat skills at the academy in Franklin that Jay had visited. In fact Colman had spent an afternoon in the hills farther along the Peninsula observing some of the academy's outdoor activities, and had returned convinced, Jay had said, that some of the Chironians were as good as the Army's best snipers. Sirocco chuckled lasciviously over the intercom. "I bet Swyley has a miraculous recovery between now and when we go into orbit." Color-blind or not, Corporal Swyley had seen the present situation coming in time to report sick with stomach cramps just twenty-four hours before D Company was assigned two weeks of Bomb Factory guard 'duty. He was "sick" because he had reported them during his own time; reporting stomach cramps during the Army's time was diagnosed as malingering..mouth. "Ah, I've been looking over your record, Fallows," he looked up. "It shows a consistent attention to detail that is very pronounced . . . everything thorough and complete, and properly documented. It's commendable, very commendable . . . the kind of thing we could do with more of in the Service."At the foot of the steps, he's paralyzed by dread. Perhaps the killers are already here. Upstairs. Waiting. Veronica nodded her head quickly a couple of times. "She's not hurt or anything like that, but she's in a lot, of trouble. '~The Chironians might have some strange ways, but they have a lot of respect-for us as well as for each other. That's not such a bad way for people to be. Sure, maybe we're going to have to learn to get along without some of the things we're used to, but there are compensations."The bewildering proliferation first of baryons and mesons, and later the quarks, which were supposed to simplify them, that had plagued studies of the structure of matter to the end of the twentieth century had been reduced to an orderly hierarchy of "generations" of particles. Each generation contained just eight particles: six quarks and two leptons. The first generation comprised the "up" and "down" quarks, each appearing in the three colorcharge variants peculiar to the strong nuclear force to give six in all; the electron; and the electron-type neutrino. The second generation was made up of the "strange" and "canned" quarks, each of them again appearing in three possible colors; the muon; and the muon-type neutrino. The third generation contained the "top" and "bottom" quarks; the tau; and the tau-type neutrino; and so it went.The owner bustled forward, twisting a cloth nervously in his hands. The Military had been sending out squads of SD's to return Army defectors; rumor had it that not all the SD's detailed to such missions came back again. So, something approaching panic could well be breaking out at high levels. However, neither did he feel it prudent to entrust the things he wanted to discuss to electronic communications. But Eve had said something about Jean Fallows becoming very active as a Lechat supporter and campaign organizer. . . That would be a good place to begin.
